

## **Bobby Combs RV Center Introduces 2026 RV Models in Arizona, Idaho, and Oregon**

*January 15, 2026*

COBURG, OR - January 15, 2026 - PRESSADVANTAGE -

Bobby Combs RV Center has introduced a selection of 2026 RV models, expanding its inventory with units from multiple manufacturers. This development occurs as the recreational vehicle industry shows signs of stabilization and projected growth in wholesale shipments.

The 2026 models encompass travel trailers, fifth wheels, and truck campers from brands including Coachmen RV, Northern Lite, Forest River RV, Keystone RV, and Lance. Select units incorporate features such as four-season insulation in Northern Lite truck campers, off-road Beast Mode packages in Forest River RV No Boundaries models, smart televisions and Bluetooth systems in Cedar Creek Cottage destinations, and automatic leveling in certain Sandpiper units. These elements represent updates appearing in the current model year lineup.

Additional models in the 2026 inventory include the Keystone RV Hideout Mini 132RD, Sunset Park RV Sun Lite LTD 19RB, Forest River RV Rockwood GEO Pro G13LE, Keystone RV Passport Classic 170BHWE, Coachmen RV Catalina Summit Series 8 261BH, Forest River RV Puma Camping Edition 263BHCE, Forest River RV Cherokee Grey Wolf Black Label 23DBHBL, Forest River RV R Pod RP-207, Forest River RV No

Boundaries NB18.3, and Coachmen RV Catalina Legacy Edition 243RBS. These units provide various floorplans, including those with bunk beds, full baths, and storage options.

As an RV dealer, Bobby Combs RV Center offers vehicles across six locations in Arizona, Idaho, and Oregon, including sites in Mesa and Yuma in Arizona, Coeur D'Alene, Hayden, and Caldwell in Idaho, and Coburg in Oregon. The inventory features numerous units, primarily travel trailers from Coachmen RV, Forest River RV, and Starcraft, with manufacturer suggested retail prices starting at \$12,990 and varying by model up to figures like \$53,367 for certain configurations. Availability includes options with bunk beds and virtual tours.

The addition aligns with industry forecasts from the RV Industry Association. The Fall 2025 edition of RV RoadSigns projects 2025 wholesale RV shipments to range between 320,400 and 353,500 units, with a median of 337,000 units. The report anticipates shipments in 2026 to reach the mid-300,000 unit range, reflecting a potential 3.6 percent increase from 2025 levels. Additional projections indicate a 2026 range of 332,400 to 366,100 units. These figures suggest a market responding to consumer interest in updated recreational vehicles amid economic factors influencing the sector.

Bobby Combs, owner of Bobby Combs RV Center, stated, "These 2026 models include the latest designs released by manufacturers."

The dealership provides services beyond sales, such as financing and consignment. Vehicles address different travel requirements, ranging from compact trailers to larger configurations. The consignment process allows for trade-ins of existing RVs, while financing options support purchases across the inventory.

Bobby Combs RV Center represents manufacturers including Jayco, Forest River, Thor, and Keystone RV across its operations. The selection process involves floorplans and brands meeting specified standards. Other represented brands encompass Prime Time RV, Dutchmen RV, Winnebago, Airstream, East to West, Heartland, Northstar, Opus, Riverside, and Starcraft, providing a range of RV types such as toy haulers and other configurations.

The inventory covers travel trailers, fifth wheels, and truck campers suitable for various travel styles. Units reflect shifts in the sector toward integrated technology and climate control systems. These components support usage over extended periods.

Bobby Combs RV Center adjusts inventory in response to sector changes. The 2026 models add to the available options, incorporating elements like radial tires and anti-lock braking in select units.

Bobby Combs RV Center operates dealerships in Arizona, Idaho, and Oregon. It handles sales of new and used RVs, along with services including preventive maintenance. Service visits incorporate a 20-point inspection performed without additional charge. Technicians conduct a thorough examination of the RV, reviewing the roof, slide-outs, tires, brakes, electrical systems, appliances, and other areas. This process detects wear, damage, or potential issues prior to occurrence. The inspection assists with readiness for trips or ongoing maintenance. The company maintains a parts department to support these services.
