

RestoPros of North Houston Expands Emergency Response Capabilities to Better Serve Greater Houston Area

January 28, 2026

SPRING, TX - January 28, 2026 - PRESSADVANTAGE -

RestoPros of North Houston has announced the expansion of its emergency restoration services throughout the Greater Houston Area and Southeast Texas, enhancing its capacity to respond to the increasing demand for professional restoration services in the region. The expansion comes as severe weather events and aging infrastructure continue to impact residential and commercial properties across the area.

The company's enhanced service capabilities include round-the-clock emergency response for water damage restoration, fire and smoke damage restoration, mold remediation, and storm damage restoration. With over 30 years of combined industry experience, the restoration specialists have positioned themselves to provide immediate assistance when property owners face unexpected disasters.

"The expansion of our services reflects our commitment to being there when North Houston residents and businesses need us most," said Sam Wafia, Operations Director at RestoPros of North Houston. "Property damage emergencies don't follow a schedule, and neither do we. Our enhanced capabilities ensure that we can respond faster and serve more clients simultaneously, which is crucial during peak storm seasons or when multiple emergencies occur."

The company's water damage restoration services address one of the most common property emergencies in the Houston area, where heavy rainfall and aging plumbing systems frequently cause flooding and water intrusion. The restoration team utilizes advanced equipment and techniques to extract water, thoroughly dry affected areas, and restore properties to their pre-damage condition. Following guidelines established by the Institute of Inspection, Cleaning and Restoration Certification (IICRC), the company ensures that all restoration work meets industry standards for safety and effectiveness.

Beyond water damage, the expanded services encompass comprehensive fire and smoke damage restoration, addressing everything from initial fire damage cleanup to complete smoke and soot removal. The company's mold remediation services have also been enhanced to address the persistent challenge of mold growth in Houston's humid climate, with specialists implementing mitigation plans during both fire and water emergencies to prevent secondary damage.

Storm damage restoration remains a critical service offering, particularly given Southeast Texas's vulnerability to hurricanes and severe weather events. The restoration team provides swift assistance to help property owners recover from storm aftermath, coordinating with insurance companies and offering flexible financing options through their partnership with Acorn Finance to ease the financial burden of unexpected restoration needs.

The expansion includes investments in additional equipment, training programs for technicians, and strategic positioning of resources throughout the service area to reduce response times. The company maintains certification and insurance coverage while adhering to IICRC guidelines, ensuring that all restoration work meets the highest industry standards.

RestoPros of North Houston specializes in comprehensive restoration services for both residential and commercial properties throughout the Greater Houston Area and Southeast Texas. As a certified and insured restoration company, they provide 24/7 emergency response for water, fire, mold, and storm damage incidents. The company offers free inspections and detailed project quotes, maintaining a reputation for completing restoration projects on time and within budget while following strict industry guidelines and safety protocols.
