Debt Support National Expands Debt Relief Services to Kansas City Region

January 20, 2026

NEW YORK, NY - January 20, 2026 - PRESSADVANTAGE -

Debt Support National announced today the expansion of its debt relief connection services to Kansas City and surrounding areas in Missouri, marking a significant geographic expansion for the New York-based company that connects consumers with debt relief program providers.

The expansion brings comprehensive debt assistance resources to Kansas City residents facing financial challenges from credit card debt, medical bills, and other forms of unsecured debt. Debt Support National now does debt relief services in Kansas City, Missouri, providing local residents with access to the company's national network of screened debt relief specialists.

"The expansion into Kansas City represents our commitment to reaching more Americans who need assistance managing overwhelming debt," said a spokesperson from Debt Support National. "With household debt continuing to rise across Missouri, we recognized the critical need to establish our presence in the Kansas City metropolitan area and provide residents with connections to qualified debt relief providers."

The company's expansion comes as financial pressures mount for many Missouri households. Recent Federal Reserve data indicate that Missouri residents carry an average of \$6,194 in credit card debt, with medical debt affecting approximately 18 percent of the state's population. The Kansas City region, as one of Missouri's major economic centers, has seen increasing demand for professional debt assistance services.

Debt Support National mentioned in this post connects individuals with debt relief providers who work directly with creditors to negotiate settlements, structure payment plans, and potentially reduce overall debt amounts. The company screens all providers in its network through a comprehensive evaluation process that assesses operational history, regulatory compliance, and client outcomes.

The debt relief connection services now available to Kansas City residents include initial consultations to assess financial situations and determine eligibility for various debt relief programs. Individuals with a minimum of \$10,000 in unsecured debt may qualify for programs through the company's network. The actual debt reduction amounts vary based on multiple factors, including the type of debt, creditor policies, and account status.

The company's network includes providers specializing in various debt relief strategies, from debt consolidation to settlement negotiations. Each provider undergoes regular review to ensure continued compliance with industry standards and regulations.

"Kansas City residents deserve access to the best debt relief service options available," added the spokesperson. "Our role is to connect them with providers who can address their specific financial circumstances and help them work toward financial stability."

Debt Support National operates as a connection service that matches consumers with appropriate debt relief providers based on their individual financial situations. The company has expanded its geographic footprint steadily over the past year, with the Kansas City expansion representing its latest effort to build a comprehensive national network. The company maintains its headquarters in New York while serving clients across multiple states through its network of affiliated debt relief specialists.
