

DigitalRez Implements SiteMinder And GDS System Channel Management Features In RezExpert Website

April 18, 2016

April 18, 2016 - PRESSADVANTAGE -

DigitalRez, a business in St. Michael, Barbados, with offices in British Columbia, Canada, and Queensland, Australia, is proud to announce that a new SiteMinder integration has been implemented with the RezExpert software. Full details have also been posted about how to install and benefit from the SiteMinder. These can be accessed at <https://support.rezexpert.com/setting-up-siteminder-in-rezexpert/>.

Kevin Hall from DigitalRez says: "Our new SiteMinder integtfeature has been designed to enable clients to accept bookings through their website in a very easy to manage way. This feature is vital to hotels, event management companies and others, since at least 30% of all bookings are now made online, if not more. And of these, 60% are made from mobile devices. This shows just how important it is for businesses to offer an online booking facility."

This provides users the capability to connect to multiple booking Channels. This capability is available through integration with SiteMinder. SiteMinder acts as the medium to receive the reservations from the different Channels (Example Booking.com, Expedia, etc) and then are relayed into the RezExpert reservation software to creating or modifying the reservation accordingly. Within RezExpert, auditing functionality is

provided to manage these reservation appropriately.

The system has been set up to meet the many demands of clients. With this, the clients have the power to manage their own business, from setting rates, providing special offers and discounts, allowing group bookings and much more. It can be setup to fit specific administrative procedures, including changing how customers receive notifications of their bookings, for instance.

RezExpert has been around for some time, but is committed to always offering the best possible service. This is why, over the course of February, it went through some significant updates and had a number of fixes implemented. "We've added a new reservations module, Marketing Module, Management features, additional Meter functionality, Client Management, Additional unit features, dual calendar control and custom field setup," adds Kevin Hall. "Plus, we carry out constant scheduled updates for new features and fixes to any issues occurred. Put together, this has made the entire system even more fit for purpose and beneficial for our clients."

Further details about the newly updated SiteMinder program are available through <https://news.rezexpert.com/?s=siteminder>. The company also includes full support features for anyone who signs up to it, so that they don't feel that they are left in the dark. RezExpert is quickly becoming an essential program for all companies enabling bookings of any kind.
