Blackhawk Plastic Surgery & MedSpa Announces Breast Surgery Financing Program

January 15, 2026

Danville, CA - January 15, 2026 -
Blackhawk Plastic Surgery & MedSpa has announced a financing program offering $1,500 toward breast surgery procedures scheduled and completed by March 31, 2026. The Danville-based practice introduced the program as part of its ongoing patient accessibility initiatives.

The $1,500 credit applies uniformly to all breast procedures performed at the facility, including breast augmentation, breast lift, breast reduction, breast reconstruction, breast implant revision, and combination procedures. The credit is applied directly to surgical costs at the time of service for qualifying patients who complete their procedures within the specified timeframe.

According to data from the American Society of Plastic Surgeons, breast augmentation and reconstruction procedures remain among the most frequently performed plastic surgeries nationwide, with over 350,000 procedures completed annually. The timing of the program aligns with typical patient planning cycles, as many individuals schedule elective procedures several months in advance to accommodate work schedules and recovery periods.

"The program structure provides patients with a defined timeframe to plan their procedures while addressing the financial considerations that often influence timing decisions," said Dr. Stephen Ronan, board-certified plastic surgeon at Blackhawk Plastic Surgery & MedSpa. "March 31, 2026 was selected as the completion date to allow adequate time for consultation, pre-operative planning, and scheduling flexibility."

The practice offers both virtual and in-person consultations for patients evaluating breast surgery options. Each consultation includes discussion of procedural details, recovery timelines, and total costs with the $1,500 credit applied. Patients receive written documentation outlining the specific terms and conditions of the financing program during their initial consultation.

Breast surgery procedures at the facility range from aesthetic enhancements to medically necessary reconstructions following mastectomy. The practice utilizes current surgical techniques and follows established protocols for patient safety and post-operative care. All procedures are performed in accredited surgical facilities with board-certified anesthesiologists.

"Patient eligibility for specific procedures is determined through individual medical evaluation and consultation," noted Dr. Ronan. "The financing program applies equally across all breast surgery categories, whether the procedure is purely aesthetic or includes reconstructive elements covered partially by insurance."

The announcement follows recent industry trends showing increased demand for transparent pricing and financing options in elective medical procedures. According to healthcare financing studies, clear cost structures and upfront financial incentives influence patient decision-making timelines and procedure selection.

Blackhawk Plastic Surgery & MedSpa serves patients throughout Northern California, offering surgical and non-surgical cosmetic treatments. The practice is staffed by board-certified plastic surgeons and medical professionals specializing in aesthetic procedures. In addition to breast surgery, the facility provides facial procedures, body contouring, skin treatments, and medical spa services. The practice maintains accreditation through relevant medical boards and adheres to established safety protocols for outpatient surgical procedures. Among the top bay area plastic surgeons, the practice has performed breast surgery procedures for patients from multiple California counties since its establishment.
