

Northwest Plumbing Heating & AC Expands Winter Heater Installation and Repair Services

January 22, 2026

DAVENPORT, Iowa - January 22, 2026 -
Northwest Plumbing Heating & AC has announced the expansion of its winter service capabilities to address increased demand for heating system maintenance and emergency repairs throughout the Quad Cities region. The company, which has served the area since 1923, has implemented enhanced diagnostic procedures and streamlined scheduling systems to help homeowners maintain reliable heating during the coldest months of the year.

The expansion comes as the company responds to seasonal patterns showing a significant increase in furnace repair requests and preventive maintenance appointments during winter months. Northwest Plumbing Heating & AC has increased its technical workforce and extended service hours to reduce wait times for both routine maintenance and emergency heating repairs.

"With temperatures dropping across the Quad Cities, we recognize the critical importance of reliable heating systems for our community," said Bill Durand, spokesperson for Northwest Plumbing Heating & AC.

"Our expanded winter service protocols ensure that residents have access to prompt, professional heating services when they need them most, whether that's routine maintenance or emergency repairs."

The company has modernized its appointment booking system to provide customers with more efficient service scheduling and improved communication about service windows and technician arrival times. These enhancements complement the company's existing 24-hour emergency service availability for both heating and plumbing needs.

As part of its educational outreach, the company maintains an active presence on YouTube and other social media platforms, providing seasonal maintenance tips and service updates to help homeowners understand their heating systems better.

Northwest Plumbing Heating & AC technicians have experience with all types of heating systems, including high-efficiency furnaces, geothermal units, traditional boilers, and ductless mini-split systems. The company has also invested in advanced diagnostic equipment to help identify potential issues before they develop into costly emergencies.

The company's Service Partner Agreements offer scheduled maintenance visits, priority service scheduling, and waived after-hours fees. These preventative maintenance plans start at $99 annually for heating systems, providing homeowners with peace of mind throughout the heating season.

Monthly specials and financing options through GreenSky make system replacements and major repairs more accessible to homeowners facing unexpected heating issues. The company continues to offer free estimates for furnace replacements and comprehensive heating system evaluations. This news article highlights the importance of regular maintenance in preventing unexpected heating system failures during peak winter demand.

Northwest Plumbing Heating & AC provides residential and commercial plumbing, heating, and air conditioning services throughout the Quad Cities area. Founded in 1923, the company has built its reputation on professional service, technical expertise, and commitment to customer satisfaction. The company offers comprehensive services, including furnace repair and installation, boiler services, geothermal systems, drain cleaning, water heater services, and preventive maintenance programs.
