Miller Tree Service, Inc. Announces Enhanced Tree Removal Services for Shreveport Storm Season Preparedness

January 22, 2026

Shreveport, Louisiana - January 22, 2026 -
Miller Tree Service, Inc., a Northwest Louisiana tree care company with over 40 years of experience, announces expanded availability of its certified arborist team to help property owners prepare for the upcoming storm season through professional tree assessment and removal services.

The Shreveport-based company has mobilized its four certified arborists and specialized crews to address the increased demand for preventive tree removal as weather patterns indicate an active storm season ahead. With over 100 years of combined experience, the team provides comprehensive evaluations to identify potentially hazardous trees before they become storm damage liabilities.

"Property owners often underestimate the risk that compromised or aging trees pose during severe weather events," said Matt Miller, President of Miller Tree Service, Inc. "Our certified arborists can identify structural weaknesses, disease indicators, and proximity concerns that make certain trees candidates for preventive removal, potentially saving thousands of dollars in property damage."

The company's state-of-the-art equipment and trained crews handle trees of any size or location throughout Shreveport, Bossier City, Benton, Haughton, and Stonewall. Each project includes complete stump removal and debris cleanup, ensuring properties are left in pristine condition.

Recent weather data from the National Weather Service indicates Northwest Louisiana experiences an average of 15 severe thunderstorm warnings annually, with wind speeds capable of toppling weakened or diseased trees. The company's 24-hour emergency response capability becomes particularly crucial during these events, though preventive removal remains the most cost-effective approach.

Beyond storm preparedness, the company addresses various tree-related challenges, including construction clearance, disease management, and aesthetic improvements. Their arborist consulting services help property owners make informed decisions about tree health, treatment options, and future plantings suitable for Louisiana's climate.

"We encourage property owners to contact us for a professional assessment before storm season intensifies," added Miller. "Early identification and removal of problem trees provides peace of mind and protects both property values and personal safety."

The company maintains full licensing and insurance coverage and holds an A+ rating with the Better Business Bureau. Their comprehensive services extend beyond removal to include stump grinding, professional pruning, and complete storm-damage cleanup when severe weather strikes.

Miller Tree Service, Inc. operates Monday through Friday from 7:30 AM to 4:30 PM, with emergency services available around the clock. The family-owned business has built its reputation on exceptional customer service and attention to detail throughout four decades of operation.

Established in Northwest Louisiana over 40 years ago, Miller Tree Service, Inc. specializes in professional tree care services, including removal, stump grinding, pruning, storm damage cleanup, and arborist consulting. The company serves residential and commercial clients throughout Shreveport, Bossier City, Benton, Haughton, Minden, Mansfield, and Stonewall, maintaining a team of four certified arborists dedicated to safe, efficient tree management solutions.
