

Hematology Oncology Associates Emphasizes Comprehensive Patient-Centered Approach to Cancer Treatment

January 29, 2026

January 29, 2026 -
Hematology Oncology Associates, a leading cancer treatment center serving Palm Beach County for over 35 years, continues to advance its patient-centered approach to comprehensive cancer care across its three Florida locations. The practice's seven board-certified hematologists and oncologists are reinforcing their commitment to combining advanced medical treatments with extensive support services to address the complete spectrum of patient needs.

The medical practice, which maintains facilities in Lake Worth, Boynton Beach, and Loxahatchee, provides a full range of cancer treatments including precision cancer medicines, surgery, radiation therapy, hormonal therapy, and stem cell transplantation. The center also specializes in treating blood disorders, coagulation conditions, leukemias, and other benign hematologic conditions.

"Cancer treatment extends far beyond medical procedures alone," said Eduardo A. Garcia, M.D., a

board-certified oncologist at the practice. "Our approach integrates state-of-the-art medical care with comprehensive support services, recognizing that successful treatment outcomes depend on addressing both the medical and personal challenges patients face during their cancer journey."

The practice has developed extensive support programs to assist patients throughout their treatment. These include financial aid and travel assistance programs designed to reduce the economic burden of cancer care, advocacy and support groups that connect patients with resources and community, and advanced care planning services. The center also maintains an active clinical trials program, providing patients access to emerging treatment options.

Patient accessibility remains a priority for the practice. Through their patient portal system, individuals can access medical records, communicate directly with their healthcare team, request prescription refills, and manage appointments. This digital infrastructure complements the in-person care provided at their facilities, which operate Monday through Friday from 8 AM to 4:30 PM.

At Hematology Oncology Associates chemotherapy treatments are administered within a framework that prioritizes patient comfort and comprehensive care coordination. The practice's approach involves careful treatment planning, ongoing monitoring, and adjustment of protocols based on individual patient responses and needs.

The center has earned strong patient satisfaction ratings, with many patients noting the staff's efficiency, competence, and compassionate approach to care. The practice's longevity in Palm Beach County reflects its established reputation for delivering quality oncological and hematological services to the community.

Hematology Oncology Associates represents a comprehensive cancer care model that addresses the multifaceted nature of cancer treatment. The practice combines advanced medical treatments with robust support services, financial assistance programs, and patient-centered care coordination. With more than three decades of service to Palm Beach County, the practice continues to evolve its approach to meet the changing needs of cancer patients while maintaining its focus on compassionate, comprehensive care delivery across its three convenient locations throughout the region.
