Code 3 Transportation Emphasizes Safety-Driven, Luxury Ground Transportation Services in the Bay Area

January 26, 2026

CONCORD, CA - January 26, 2026 -
Code 3 Transportation, a Certified Minority and Veteran Owned transportation provider, continues to expand its presence across the Bay Area by delivering safety-focused, professional ground transportation services supported by modern fleet technology and operational compliance. Serving both corporate and private clients, the company operates with a mission rooted in reliability, preparedness, and customer care.

Founded by firefighter and military veteran Lester Lesavoy, Code 3 Transportation was established with safety as its operational foundation. Lesavoy?s background in emergency response shaped the company?s approach to risk management, driver training, and vehicle standards, embedding safety protocols into everyday operations rather than treating them as secondary considerations.

?Transportation is about trust,? said Lester Lesavoy, Founder of Code 3 Transportation. ?Our responsibility begins long before a passenger enters the vehicle. It includes preparation, compliance, and attention to detail at every stage of the ride.?

The company is family-owned and operated, with leadership shared by Lester?s brother, Aaron Lesavoy, who serves as Chief Operating Officer. Aaron is a trained Emergency Medical Technician and remains actively involved in the health and safety industry. His expertise contributes to the company?s internal policies, driver oversight, and incident preparedness standards, reinforcing a culture built around accountability and situational awareness.

Code 3 Transportation offers a range of ground transportation services designed to meet professional and personal travel needs. Core services include corporate transportation for executives and business teams, airport transportation with scheduled and on-demand availability, wedding transportation coordinated for timelines and guest logistics, wine tours tailored for private groups, and concert transportation intended to reduce congestion and parking challenges for attendees.

The company?s limousine services in San Jose, CA, are supported by a fleet of luxury model vehicles equipped with current safety and navigation technologies. Vehicles are maintained according to manufacturer guidelines and regulatory requirements, and the company remains current on all required licenses and permits. This operational compliance supports consistent service delivery and aligns with regional and state transportation standards.

To streamline client access, Code 3 Transportation operates a 24-hour reservation system that allows users to book and manage transportation at any time. The system supports advanced scheduling as well as time-sensitive requests, reflecting the varied demands of business travel, event coordination, and personal transportation.

The company serves multiple Bay Area markets, including San Jose, Oakland, Fremont, Santa Clara, Mountain View, and Milpitas. These service areas place Code 3 Transportation in proximity to major corporate campuses, airports, event venues, and hospitality destinations, allowing for efficient routing and scheduling.

Customer feedback has played a measurable role in the company?s growth. Code 3 Transportation maintains a 4.9 out of 5 Google rating, based on verified customer reviews citing punctuality, professionalism, and vehicle condition as consistent strengths. This rating reflects ongoing efforts to align service delivery with client expectations rather than reliance on promotional messaging alone.

Driver standards remain a central focus of operations. Chauffeurs are selected and trained with an emphasis on situational awareness, professionalism, and adherence to company protocols. This approach is intended to support predictable service outcomes regardless of trip type or location.

As a Minority and veteran-owned business, Code 3 Transportation also reflects a broader commitment to service-oriented leadership. The company?s operational model draws from public safety and healthcare principles, prioritizing preparation, communication, and responsibility over volume-based growth.

Looking ahead, Code 3 Transportation plans to continue refining its service model while maintaining its focus on safety, compliance, and customer experience. Growth initiatives remain tied to operational readiness rather than expansion for its own sake, ensuring that service standards remain consistent across all markets served.
