

Amana Care Clinic Expands Urgent Care Services Across Davenport and Muscatine Regions

January 29, 2026

DAVENPORT, Iowa - January 29, 2026 -
Amana Care Clinic has expanded its walk-in medical services to better serve patients across the Quad Cities region, with locations now operating in Davenport, Bettendorf, and Muscatine, Iowa. The urgent care clinic continues to address growing demand for accessible, non-emergency medical treatment without the need for appointments.

The expansion reflects increasing community needs for timely health care services, particularly as residents seek alternatives to emergency room visits for non-life-threatening conditions. The clinic treats a comprehensive range of conditions including respiratory infections, minor injuries, fractures, burns, and provides diagnostic services including X-rays and laboratory testing.

"The expansion of our services across multiple communities demonstrates our commitment to making quality medical care more accessible," said Moutaz Kotob, PhD, Medical Director at Amana Care Clinic. "Patients throughout the region now have greater access to professional medical treatment when they need it, without

the long waits typically associated with emergency departments."

The Davenport health clinic location serves as the primary facility, offering full diagnostic capabilities including on-site X-ray equipment and laboratory services. The clinic's certified medical professionals diagnose and treat conditions ranging from common childhood illnesses to sports injuries, providing same-day care for patients who either walk in or reserve their spot online.

Recent data from the Iowa Department of Public Health indicates that urgent care facilities have become increasingly vital to community healthcare infrastructure, with more than 60 percent of emergency room visits being for non-emergency conditions that could be treated at urgent care centers. This trend has driven demand for accessible walk-in clinics throughout Iowa's urban and suburban areas.

The clinic's medical staff maintains expertise in treating seasonal health concerns, from summer sunburns and insect bites to winter respiratory infections and weather-related injuries. Sports physicals, required for student athletes throughout the school year, represent another key service area as local schools and youth sports organizations require medical clearance for participation.

"Our goal is to bridge the gap between primary care physicians and hospital emergency departments," added Dr. Kotob. "Many conditions require prompt medical attention but don't constitute true emergencies. We provide that middle ground where patients receive thorough, professional care in a timely manner."

The facility's diagnostic capabilities allow for comprehensive evaluation and treatment during a single visit. Laboratory services enable rapid testing for conditions such as urinary tract infections, while X-ray equipment assists in diagnosing fractures and other musculoskeletal injuries.

Amana Care Clinic operates as a walk-in medical facility providing treatment for non-emergency conditions across multiple Iowa locations. The clinic offers comprehensive urgent care services including treatment for injuries, infections, minor fractures, and common illnesses, supported by on-site laboratory and X-ray capabilities. Established to serve the Quad Cities region, the clinic provides an alternative to emergency room visits for non-life-threatening medical needs.
