

## **Palmate Home And Gardening Releases New Electric High Pressure Washer Review**

*April 01, 2016*

April 01, 2016 - PRESSADVANTAGE -

Palmate Home and Gardening has recently released a new product review highlighting the features and benefits of the Electric High Pressure Washer. The company frequently releases these reviews and they are the go-to resource for in-depth information about garden and home products. The new review is already garnering a lot of interest.

"Some people are spending a lot of time removing dirt, stains, oil, grime and grease on their driveway, home exterior and even home furniture," says spokesperson for Palmate Gardening, Pete Bowes. "Although the traditional cleaning method of using chemical solvents is effective, it is still recommended to have a pressure washer at home. Electric pressure washers are great tools to make your home and garden projects easier. That being said, we felt that the Electric High Pressure Washer was one product we simply had to try."

The electric pressure washer features two detergent tanks, each with the capacity to hold up to 0.9 liter. This means that users can switch between sections, using the selector knob. In so doing, the washer eliminates the need for frequent stopping and starting, forcing people to remove detergents and possibly experiencing problems with the wrong detergents. At the same time, only approved detergents can be used in the washer.

The review also highlights the 35 foot power cord, large wheels and tall pressure hose. Put together, these increase the maneuverability of the pressure washer, while at the same time enabling users to get to the hard to reach places that are often found outdoors.

Palmate Home and Gardening is known for their honesty, which is why they also highlight some of the issues that they encountered in using the pressure washer. Their main issue is that, with this particular product, the manual leaves something to be desired. However, they do highlight that the product's manufacturer has included a number of instructional videos and other pieces of information on their website.

The review and the pressure washer itself are now available online. People are encouraged to look through the pros and cons highlighted about the device, so that they can determine whether it is right for them.
