

Palmate Gardening Releases New Chamberlain Garage Door Opener Review

April 19, 2016

April 19, 2016 - PRESSADVANTAGE -

Palmate Home and Garden, a popular resource for in-depth garden and home product reviews, has published a new review to their website, and this is for the Chamberlain Whisper Garage Door Opener. Company spokesperson Pete Bowes states, "We recently reviewed the Chamberlain WD962KEV Whisper Drive Garage Door Opener and we are happy to offer that review on our site."

Pete Bowes explains that the product review gives a comprehensive look at the garage door opener, including all of its many benefits and why consumers should seriously consider purchasing it. The review begins with an overview of garage door openers and lists different things that consumers should look for when purchasing one. It goes on to give an overview of a handful of garage door openers, specifically those with smartphone control capabilities, which according to the review is one thing that makes the Chamberlain model very beneficial.

"The overall review of the Chamberlain garage door opener is a positive one," says Pete Bowes. "The entire product is great, and has the MyQ smart phone control, which is something that really puts it over the top."

The Palmate Garden and Home review states that the garage door opener features a belt drive system, which makes it very quiet in its operation. In addition, because of its various capabilities, it is now considered to be one of the best on the market. According to the review, "The battery back-up goes to work and opens/closes the door 20 times. Imagine, the owner can set a timer to have the garage door close in one, five or ten minutes. It includes two remote controls, one wireless key entry and one control panel."

The opener can be used with a Chamberlain universal garage door opener, which allows the consumer to open and close his or her garage door from a number of places, none of which needs to be at home. The review goes in-depth listing various benefits of this particular garage door opener, which is now available for sale online.

Those who are interested in getting more information about the garage door opener can read the review on the Palmate Home and Gardening official website.
