SERVPRO of Shakopee/Savage/Prior Lake Looks to 2026 With Commitment to Excellence

February 20, 2026

SAVAGE, MN - February 20, 2026 -
SERVPRO of Shakopee/Savage/Prior Lake has announced its strategic focus for 2026, emphasizing a continued commitment to delivering professional restoration services throughout the Twin Cities southwest suburbs. The locally owned franchise, which has served the region for nearly three decades, plans to maintain its established reputation for rapid emergency response and comprehensive property restoration solutions.

The company specializes in addressing water damage, fire damage, and mold remediation for both residential and commercial properties. With more than 30 employees and IICRC certifications in water, mold, and fire restoration, the franchise operates as a family-owned and women-owned business serving communities including Shakopee, Savage, Prior Lake, Chaska, Chanhassen, and surrounding areas.

According to Scott Clemente, Owner of SERVPRO of Shakopee/Savage/Prior Lake, the franchise remains dedicated to its founding mission. "Our goal has always been to help property owners navigate difficult situations with professionalism and care," Clemente stated. "We're focused on maintaining the high standards our customers have come to expect from us."

The franchise offers 24-hour emergency services with an average response time of 60 minutes. Teams respond to a variety of property emergencies, including basement flooding, burst pipes, sewage backups, fire damage, smoke remediation, and mold issues caused by water intrusion or poor ventilation. The company also provides reconstruction services, allowing clients to work with a single provider from initial damage assessment through final repairs.

SERVPRO of Shakopee/Savage/Prior Lake assists property owners with insurance claim documentation and communication. The franchise utilizes the Xactimate pricing system, which is widely recognized by insurance carriers, and works directly with insurance providers to help ensure proper compensation for covered damages. This service model addresses a common concern among property owners who face the dual challenge of managing property restoration while navigating insurance requirements. By streamlining the claims process and providing clear, consistent updates, the team helps reduce delays and minimizes stress for clients during a difficult time.

The franchise serves a region characterized by cold weather conditions that can lead to frozen pipes and winter-related property damage. The area also experiences storm activity and heavy rainfall, contributing to water intrusion issues. These environmental factors create ongoing demand for professional restoration services equipped to handle regional climate challenges.

As part of the SERVPRO franchise network, the local operation benefits from access to advanced equipment, proven restoration techniques, and ongoing training programs. IICRC certification requires technicians to complete specialized training in industry-standard protocols for water extraction, structural drying, mold remediation, and fire damage restoration. The franchise maintains these certifications as part of its operational standards.

The company's service model emphasizes rapid mobilization and thorough documentation. When property owners contact SERVPRO of Shakopee for emergency assistance, teams arrive equipped to assess damage, implement mitigation measures, and develop restoration plans. Services range from water damage restoration involving extraction and structural drying to fire damage cleanup that addresses soot removal, smoke odor elimination, and content restoration.

The franchise continues to operate with a focus on community connection and local expertise. As a locally owned business with nearly 30 years of regional experience, the company maintains familiarity with common property challenges specific to the Twin Cities southwest suburbs and works within the local referral network of contractors and service providers.

SERVPRO of Shakopee/Savage/Prior Lake enters 2026 positioned to continue serving property owners facing emergency restoration needs while maintaining the operational standards that have defined its three decades of service to the community.
