

## **Bare Skin and Beauty Highlights Facial Techniques As Demand Grows for Personalized Skin Care in Perth**

*January 29, 2026*

HILLARYS, WA - January 29, 2026 - PRESSADVANTAGE -

Bare Skin and Beauty, an established skin care clinic with locations in Hillarys and Ellenbrook, is addressing the increasing demand for personalized facial treatments in Perth through its comprehensive approach to clinical skin care. The clinic combines advanced technology with customized treatment protocols to meet the diverse skin care needs of Western Australian clients.

The growing interest in professional skin treatments reflects broader trends in the beauty industry, where consumers increasingly seek targeted solutions for specific skin concerns. At the Hillarys clinic, practitioners utilize advanced diagnostic tools, including Observ imaging technology to create detailed skin assessments before developing individualized treatment plans.

"The shift toward personalized skin care represents a fundamental change in how people approach their skin health," said Leon Brook, a spokesperson from Bare Skin and Beauty. "Rather than applying one-size-fits-all solutions, we analyze each client's unique skin profile to determine the most effective combination of treatments and products for their specific concerns, whether that involves addressing pigmentation, managing acne, or implementing anti-aging protocols."

The clinic's approach integrates multiple treatment modalities, including hydrodermabrasion, LED light therapy, skin needling, and enzyme treatments. These services are complemented by clinical-grade product lines from established brands such as Medik8, O Cosmedics, Dermaviduals, and Mesoestetic. Each treatment protocol is adjusted based on individual skin responses and changing seasonal conditions that affect skin behavior in the Perth climate.

For those seeking to learn more about facials and their benefits, the clinic provides comprehensive consultations that explain how different treatments work and which approaches might suit specific skin types. This educational component helps clients understand the science behind various treatments, from collagen induction through microneedling to the cellular benefits of LED therapy.

The facility inside Whitfords Shopping Centre serves clients from Hillarys and surrounding suburbs, offering treatments that range from relaxation facials focused on barrier repair to intensive clinical procedures targeting advanced signs of aging. The clinic's signature treatments include the Bare Skin Experience Facial, Brightening Platinum Facial, Deep Hydration Facial, and specialized lymphatic therapy options.

"Education plays a crucial role in helping clients achieve their skin goals," added Brook. "When people understand how their skin functions and why certain treatments work, they become more engaged in their skin care journey and typically see better long-term results."

For those seeking clinic information, Bare Skin and Beauty maintains detailed treatment descriptions and skin care resources to help potential clients make informed decisions about their skin health needs. The clinic also offers membership programs that provide regular access to treatments and professional-grade skin care products.

Bare Skin and Beauty operates two locations in Perth, specializing in non-invasive advanced facial treatments. The company has received recognition from O Cosmedics and Dermaviduals for its treatment protocols and was nominated for a design award for its clinic interiors. The business focuses on treatments that work with the skin's natural processes rather than against them, emphasizing long-term skin health over temporary cosmetic improvements.
