Show Me Dumpsters Expands Services in Kansas City Missouri with 40 Yard Dumpster Options

January 30, 2026

KANSAS CITY, MO - January 30, 2026 -
Show Me Dumpsters LLC has expanded its waste management capabilities with the addition of 40-yard dumpster rentals to better serve large-scale residential and commercial projects throughout the Kansas City metropolitan area. The expanded service addresses growing demand from contractors, property managers, and homeowners undertaking major renovation and demolition projects.

"Adding 40-yard containers to our fleet represents a strategic response to customer needs across the Kansas City metro area," said Roy Zimmer, owner of Show Me Dumpsters. "Many of our commercial and residential clients were requesting larger capacity options for major projects, and this expansion allows us to serve everything from small home cleanups to large-scale commercial demolitions with the same level of professional service."

The new 40 yard dumpster service in Missouri provides capacity for extensive projects, including full home cleanouts, major renovations, new construction, and demolition work. Commercial clients managing warehouse turnovers, apartment complex renovations, and storm debris removal now have access to larger capacity containers that can accommodate up to four tons of waste material.

The 40-yard dumpsters measure 20 feet long, 8 feet wide, and 7 feet high, making them suitable for projects generating substantial amounts of construction debris, landscaping waste, or general refuse. The seven-day rental period includes four tons of waste disposal, with options for extended rental periods and additional tonnage as needed.

Show Me Dumpsters maintains a comprehensive fleet ranging from 15-yard containers for smaller residential projects to the newly available 40-yard units. The company serves various industries, including warehousing, logistics, property management, roofing, remodeling, and demolition, throughout Kansas City and surrounding areas.

The expanded service includes same-day delivery options, online booking capabilities, and certified disposal practices that ensure compliance with environmental regulations. Commercial clients managing multi-container projects benefit from coordinated scheduling and dependable service that minimizes project delays.

Roll-off dumpster service in Missouri has seen increased demand as construction activity and property renovations continue throughout the region. The waste management industry has responded to growing needs for efficient, environmentally responsible disposal solutions that comply with local regulations while maintaining transparent pricing structures.

"The addition of 40-yard dumpsters positions us to handle virtually any size project our customers require," added Zimmer. "Whether managing storm cleanup after severe weather or supporting new construction developments, having the right size container available makes projects more efficient and cost-effective."

Based in Kansas City, Missouri, Show Me Dumpsters LLC provides residential and commercial waste management solutions throughout the metropolitan area. The company specializes in roll-off dumpster rentals, offering transparent pricing, professional service, and flexible rental terms. As a member of the Kansas City Chamber of Commerce, the company maintains strong ties to the local business community while serving diverse industries including construction, property management, and residential renovation sectors.
