

Drake's 7 Dees Landscaping and Garden Center Emphasizes Critical Sprinkler System Maintenance

February 05, 2026

Portland, Oregon - February 05, 2026 -
Drake's 7 Dees Landscaping and Garden Center, a Portland-based landscape design and maintenance company with over 60 years of experience, is reminding property owners about the importance of regular sprinkler system maintenance as the region transitions through seasonal weather changes.

The company, which provides comprehensive landscape services throughout the Portland area, emphasizes that proper sprinkler system care extends beyond basic seasonal adjustments. Regular maintenance helps prevent costly repairs, conserves water, and ensures optimal landscape health throughout the year.

"Sprinkler systems are often the most overlooked component of landscape maintenance, yet they're absolutely critical to protecting the investment homeowners have made in their outdoor spaces," said Drake Snodgrass, founder of Drake's 7 Dees. "A properly maintained system not only saves water and reduces utility costs but also ensures that plants receive the precise amount of water they need to thrive in our unique Pacific Northwest climate."

Drake's 7 Dees Landscaping and Garden Center sprinkler system maintenance services encompass comprehensive inspections, adjustments, repairs, and seasonal winterization. The company's technicians check for leaks, adjust spray patterns, replace worn components, and ensure proper water pressure throughout the system. This proactive approach helps identify potential issues before they become major problems requiring extensive repairs.

The Portland area's climate presents unique challenges for irrigation systems. Winter freezes can damage pipes and components if systems aren't properly winterized, while summer drought conditions require precise calibration to maintain landscapes without wasting water. Spring and fall transitions demand careful adjustments to watering schedules as plant water needs change with temperature and rainfall patterns.

Beyond basic maintenance, the company also provides sprinkler system design and installation services, ensuring new systems are properly configured for each property's specific needs. Their technicians consider factors including soil type, sun exposure, plant varieties, and slope when designing and maintaining irrigation systems.

The company's commitment to sustainable practices extends to their approach to irrigation management. Efficient sprinkler systems reduce water waste while maintaining healthy landscapes, aligning with Portland's environmental conservation goals. Regular maintenance ensures systems operate at peak efficiency, preventing overwatering that can lead to plant disease and unnecessary water consumption.

Drake's 7 Dees has served Portland area properties for more than six decades, offering a comprehensive range of landscape services including design and build projects, lighting installation, water feature construction, and ongoing maintenance. The company is known for its lifetime plant warranty and dedication to creating beautiful, sustainable outdoor spaces. Their services extend beyond irrigation to include artisan pruning, private gardener services, and the installation of various landscape features such as patios, pergolas, outdoor kitchens, and fire pits.

The company maintains a full-service garden center alongside its landscape services division, providing plants, materials, and expertise to both professional landscapers and homeowners throughout the Portland metropolitan area.
