

Keathley Landscaping Expands Professional Sod Installation Services Across North Texas Communities

February 09, 2026

GARLAND, TX - February 09, 2026 - PRESSADVANTAGE -

Keathley Landscaping, a Dallas-based landscaping company serving North Texas since 2002, announces expanded availability of professional sod installation services throughout Rockwall, Wylie, and surrounding communities. The company specializes in rapid lawn transformations, converting bare or damaged yards into lush green spaces within one to three days.

The company's sod installation process begins with the complete removal of existing vegetation and thorough soil preparation. Technicians evaluate each property for potential issues, including poor drainage, pest problems, or soil deficiencies that could affect the new lawn's establishment. This detailed preparation distinguishes professional installation from basic grass laying services.

The expansion addresses growing demand for professional lawn installation services as property owners seek to enhance their outdoor spaces and increase property values. The company offers comprehensive sod installation Rockwall residents can rely on for transforming their yards from problematic dirt patches to

healthy, established lawns.

"Professional sod installation requires more than just laying grass on dirt," said Logan Keathley, NDS Certified Drainage Contractor and owner of Keathley Landscaping. "We address underlying issues like drainage problems, soil preparation, and proper grading before installation. This comprehensive approach ensures the new lawn thrives for years to come, not just weeks."

Keathley Landscaping offers multiple grass varieties suited to North Texas climate conditions, including St. Augustine, Zoysia, Bermuda, and Tall Fescue. Each variety provides different benefits regarding shade tolerance, drought resistance, and maintenance requirements. The company's specialists help property owners select the most appropriate grass type based on their specific yard conditions and maintenance preferences.

Beyond basic sod installation, the company addresses complex landscaping challenges that often accompany lawn replacement projects. As a certified drainage contractor, Logan Keathley brings specialized expertise to properties experiencing water management issues. This dual capability allows the company to solve drainage problems during the lawn installation process, preventing future issues with standing water or erosion.

The Wylie sod company also provides comprehensive landscaping services, including stonework, retaining walls, landscape lighting, and hardscape installations. This full-service approach enables property owners to coordinate multiple outdoor improvements through a single contractor, ensuring consistent quality and integrated design across all project elements.

Recent projects demonstrate the company's capability to handle properties of various sizes and complexities. From small residential yards requiring simple grass replacement to large estates needing complete landscape renovation, the team adapts its approach to meet specific project requirements while maintaining consistent installation standards.

Keathley Landscaping has built its reputation through two decades of service across Dallas, Garland, Wylie, Plano, Rockwall, and neighboring communities. The company maintains a focus on practical solutions and reasonable pricing while delivering professional-grade results. Their approach combines traditional landscaping expertise with modern installation techniques and materials, ensuring durable and attractive outdoor spaces for North Texas property owners.
