

Go Industries Inc Expands Truck Grille Guards Line with Enhanced Modular Winch Systems

February 05, 2026

Richardson, TX - February 05, 2026 -
Go Industries Inc, a Texas-based manufacturer of heavy-duty truck accessories, has expanded its commercial-grade winch grille guard offerings with enhanced modular design features that provide integrated protection and winching capabilities for commercial fleet operators and off-road enthusiasts.

The expanded product line addresses growing demand from fleet operators and commercial truck owners seeking integrated winch systems with enhanced protection capabilities. The modular design allows customers to start with a base system and add components as their requirements evolve, providing a practical investment approach for long-term vehicle protection.

The winch grille guards feature construction from 5/16-inch laser-cut steel uprights paired with 2.5-inch 16-gauge steel cross tubes, delivering substantial protection for commercial vehicles operating in demanding environments. The system accommodates either 9.5 or 16.5 winch carriers, offering flexibility for different winching requirements across various vehicle applications.

"The expansion of our winch system product line reflects our commitment to meeting the evolving needs of commercial truck operators who require both protection and recovery capabilities in a single, integrated solution," said a Go Industries spokesperson. "The modular approach allows fleet managers to customize their grille guards based on specific operational requirements while maintaining the durability and protection our products are known for."

The enhanced grille guards are designed to fit full-sized Chevrolet, GMC, Dodge, and Ford trucks and SUVs. Each unit includes custom heavy-duty mounting brackets engineered for maximum strength and simplified installation. The system features frame-mounted no-drill installation with heavy-duty rubber pads, reducing installation time and preserving vehicle integrity.

Optional brush guards complement the vehicle lines while creating additional protection to the headlight area from road debris and off-road brush. The modular design serves as a foundation for adding winch carriers and brush guards, allowing operators to configure their protection systems according to specific operational demands.

All components maintain provisions for tow hook retention or provide tow hook openings on all applications, ensuring compatibility with existing recovery equipment. The products feature a rugged matte black powder coat finish designed to withstand harsh environmental conditions.

The expansion builds on Go Industries' 46-year history of providing fleet, truck, and law enforcement accessories. Since 1978, the company has developed specialized equipment for commercial vehicles, including front and back end protection systems, bumper replacements, headache racks, and custom manufacturing solutions.

All compaonents for winch grille guards are manufactured in the United States and backed by a three-year warranty covering materials, workmanship, and finish. The warranty demonstrates the company's confidence in product durability and performance under commercial use conditions.

Go Industries Inc specializes in heavy-duty truck accessories, law enforcement equipment, and custom manufacturing solutions. The company maintains Platinum Status with SEMA and operates from its manufacturing facility in Richardson, Texas, serving commercial fleet operators, law enforcement agencies, and individual truck owners throughout North America.
