

Go Industries Inc Expands Custom Manufacturing and Fabrication Capabilities for OEM Partners

February 11, 2026

Richardson, TX - February 11, 2026 -
Go Industries Inc, a Texas-based manufacturer with over four decades of experience, announces the expansion of its custom manufacturing and fabrication services to meet growing demand from original equipment manufacturers across multiple industries. The company has enhanced its production capabilities to serve sectors including automotive, telecommunications, medical equipment, and the emerging AI data center infrastructure market.

The expansion includes advanced precision manufacturing capabilities for AI data center server racks, addressing the rapid growth in data infrastructure needs across the technology sector. Go Industries now offers comprehensive tube services including CNC bending, rolling, end forming, and sawing, alongside expanded sheet metal capabilities featuring robotic welding, laser cutting, and plasma cutting technologies.

"The expansion of our custom fabrication services reflects our commitment to meeting the evolving needs of OEM partners across diverse industries," said a Go Industries spokesperson. "With our two state-of-the-art

facilities in Texas and over 40 years of manufacturing expertise, we are positioned to deliver precision-engineered solutions with competitive pricing and rapid turnaround times."

The company's OEM manufacturing services now encompass design and engineering, certified welding to D1.1, B31.1, and B31.3 standards, assembly, packaging, chrome plating, powder coating, and pipe profiling. These capabilities enable Go Industries to serve as a comprehensive manufacturing partner for businesses seeking to bring products to market efficiently.

Go Industries utilizes advanced equipment including a high-capacity powder coating line and batch oven for finishing products. The company maintains an extensive inventory of tooling and machinery, allowing for cost-effective production solutions across varying order volumes. All manufacturing takes place at the company's Texas facilities, ensuring quality control and rapid delivery to North American markets.

The expanded services support industries including automotive, cable and wire, commercial equipment, emergency equipment, defense, Department of Transportation, gas, medical, oil, public safety divisions, sport and fitness, transportation safety equipment, and telecommunications. This diverse industry focus demonstrates the versatility of Go Industries' manufacturing capabilities and engineering expertise.

Private label programs remain a key component of the expanded offerings, enabling businesses to develop and launch their own branded products without investing in manufacturing infrastructure. These programs include comprehensive support from initial design through final delivery, leveraging Go Industries' established production processes and quality assurance protocols.

Go Industries Inc, established in 1978, specializes in truck accessories, law enforcement equipment, and custom manufacturing solutions. The company holds Platinum Status with SEMA, reflecting its commitment to quality and innovation in the automotive aftermarket industry. As a division of Longhorn Reels, Go Industries combines specialized manufacturing expertise with broader industrial capabilities to serve diverse market segments. The company continues to invest in advanced manufacturing technologies and process improvements to maintain its position as a leading custom manufacturer in the Southwest region.
