

Keathley Landscaping Expands Sod Installation and Yard Drainage Solutions for North Texas Properties

February 13, 2026

GARLAND, TX - February 13, 2026 -
Keathley Landscaping has expanded its professional landscaping services to address the growing demand for comprehensive lawn establishment and water management solutions across North Texas. The Dallas-based company now offers enhanced sod installation capabilities paired with advanced drainage system design to help homeowners overcome the region's challenging clay soil conditions and irregular rainfall patterns.

The expansion responds to increasing requests from property owners struggling with damaged lawns and persistent water issues that threaten both landscapes and foundations. The company's dual approach addresses the interconnected nature of lawn health and proper drainage, providing complete solutions rather than temporary fixes.

"Poor drainage remains the leading cause of lawn failure in North Texas, yet many homeowners don't realize the connection until their new sod fails within months," said Logan Keathley, founder and NDS Certified

Drainage Contractor. "By combining our drainage expertise with professional sod installation, we're able to create sustainable landscapes that thrive despite our challenging climate conditions."

The company's sod installation process transforms properties from bare soil to established lawns within one to three days, depending on property size. The comprehensive service includes complete removal of existing vegetation, thorough soil preparation, and evaluation for underlying issues such as drainage problems, pest infestations, or soil deficiencies. Installation teams work with various grass types suited to North Texas conditions, including St. Augustine, Zoysia, Bermuda, and Tall Fescue varieties.

For properties experiencing water management challenges, the company provides drainage solutions incorporating French drains, advanced grading techniques, channel drain systems, and custom-designed buried drainage pipes. As an NDS Certified Drainage Contractor, the company brings specialized expertise to complex water management issues that standard landscaping services often cannot address.

Beyond sod and drainage services, the expanded offerings include comprehensive landscaping solutions such as stonework, retaining walls, landscape lighting, hardscape installations, fence repair and installation, patio covers, outdoor kitchens, and tree services. This integrated approach allows property owners to address multiple landscape needs through a single contractor, ensuring consistency in quality and design.

The timing of the expansion aligns with seasonal patterns in Rockwall Texas and surrounding communities, where spring and fall present optimal conditions for lawn establishment and drainage improvements. Property owners increasingly recognize the value of professional installation over DIY attempts, particularly given the technical challenges of proper grading and drainage design.

Keathley Landscaping has served the North Texas region since 2002, building a reputation for rapid project completion while maintaining high standards for quality and long-term sustainability. The company specializes in finding practical solutions to complex landscape challenges, combining traditional landscaping techniques with modern drainage technology to create functional and attractive outdoor spaces. Their service area encompasses Dallas, Garland, Wylie, Plano, and surrounding communities throughout North Texas.
