

Brilliant Cleaning and Restoration Expands Mold Remediation Services Throughout Four-State Region

February 25, 2026

JOPLIN, MO - February 25, 2026 - PRESSADVANTAGE -

Brilliant Cleaning and Restoration, a Joplin-based damage restoration company, announces the expansion of its mold remediation services to address increasing demand for professional mold removal and prevention throughout Southwest Missouri, Northeast Oklahoma, Northwest Arkansas, and Southeast Kansas.

The expansion comes as recent weather patterns and flooding incidents have contributed to a rise in mold-related property damage across the Four-State area. The company now deploys IICRC-certified technicians equipped with EPA-approved methods and advanced detection technology to properties within a 150-mile radius of Joplin, Missouri.

Brilliant Cleaning and Restoration Mold Remediation Services encompasses comprehensive inspection, removal, and prevention protocols designed to address mold contamination in residential and commercial properties. The expanded service area includes Springfield, Miami, Pittsburg, and Bentonville, with 24/7 emergency response capabilities to minimize property damage and health risks associated with mold

exposure.

"Mold contamination can develop within 24 to 48 hours following water damage, making rapid response critical for property preservation," said Justin, Operations Manager at Brilliant Cleaning and Restoration. "Our expanded service capabilities allow us to deploy certified technicians quickly throughout the region, utilizing HEPA filtration systems and moisture detection equipment to identify and eliminate mold at its source."

The mold remediation process involves detailed air quality assessments, biocide treatments, HVAC system decontamination, and moisture control measures. These services address the growing concerns of property owners facing mold-related challenges due to the region's varying humidity levels and seasonal weather patterns.

Brilliant Cleaning and Restoration Disinfection Services complement the mold remediation efforts through thorough sanitization protocols that ensure properties meet health and safety standards. The company's enhanced service portfolio also includes water damage restoration, fire damage restoration, crawl space encapsulation, debris removal, and biotrauma cleanup.

Industry data indicates that properties with crawl spaces, basements, or previous water damage history face heightened risks of mold development. The expansion addresses these regional challenges as aging infrastructure and variable weather patterns continue to impact properties throughout the Four-State area.

The company maintains licensing, bonding, and insurance coverage while employing technicians who undergo continuous training to stay current with industry standards and restoration technologies. The expansion represents a response to growing regional demand for professional mold remediation services following severe weather events and flooding incidents that have affected Southwest Missouri and surrounding states.

Brilliant Cleaning and Restoration operates from its headquarters at 8443 East 7th Street in Joplin, Missouri. The company has served the Four-State area since establishing operations, providing damage restoration services to residential and commercial properties. The expanded mold remediation services are available immediately to property owners throughout the service area.
