

Davis & Son Expands Air Conditioning Services Across Southwest Missouri Communities

February 27, 2026

MONETT, MO - February 27, 2026 -
Davis & Son, a leading HVAC and plumbing company serving Southwest Missouri for over four decades, has announced expanded service capabilities to meet growing demand for professional air conditioning and heating solutions across eight counties in the region.

The expansion reinforces the company's position as a comprehensive service provider, offering everything from emergency repairs to complete system installations for residential, commercial, and industrial clients throughout Barry, Lawrence, Christian, Greene, Jasper, Newton, McDonald, and Stone counties.

"After 40 years of serving Southwest Missouri, we continue to see increasing demand for reliable HVAC and plumbing services," said Kristen, a company representative for Davis & Son. "Our expanded service capabilities allow us to respond more quickly to customer needs while maintaining the quality workmanship that has defined our reputation since day one."

Davis & Son Air Conditioning Contractor provides comprehensive cooling solutions including central air conditioning systems, ductless mini-split installations, heat pump systems, and smart thermostat integration. The company's certified technicians handle routine maintenance such as refrigerant checks, coil cleaning, filter replacements, and complete system performance evaluations. Emergency repair services address common issues including compressor failures, thermostat malfunctions, and refrigerant leaks.

Beyond traditional cooling services, the company has invested in indoor air quality solutions, recognizing the growing importance of healthy home environments. These services include air purification system installations, UV light technology integration, dehumidifier setups, and professional duct cleaning services.

The company emphasizes preventive maintenance as a cornerstone of their service philosophy, recommending annual HVAC system inspections to prevent costly breakdowns and extend equipment lifespan. Their maintenance programs include thorough system inspections, performance testing, thermostat calibration, and detailed reporting on system conditions.

Davis & Son Plumbing Services complements the HVAC offerings with comprehensive plumbing solutions ranging from routine maintenance to emergency repairs. The plumbing division handles pipe repairs, drain cleaning, water heater installations, and complex commercial plumbing projects. This dual expertise allows the company to address interconnected home comfort systems more effectively than single-service providers.

Recent investments in diagnostic technology and ongoing technician training ensure the company stays current with evolving HVAC technologies and efficiency standards. This commitment to professional development enables their team to service both legacy systems and the latest high-efficiency equipment from major manufacturers.

The expanded service area now encompasses major population centers including Springfield, Cassville, and Monett, along with numerous smaller communities throughout Southwest Missouri. This geographic reach, combined with their emergency response capabilities, positions the company as a primary service provider for the region's HVAC and plumbing needs.

Davis & Son maintains active engagement with the Southwest Missouri community through social media platforms, providing seasonal maintenance tips, energy efficiency guidance, and updates on service offerings. This digital presence complements their traditional service model, allowing customers multiple channels for scheduling and information access.

Based in Monett, Missouri, Davis & Son has built its reputation on integrity, innovation, and customer satisfaction over four decades of continuous operation. The company provides comprehensive air conditioning, heating, and plumbing services to residential, commercial, and industrial clients throughout Southwest Missouri.
