

Williams and Sons Custom Construction and Design Expands Home Additions Services Throughout Southwest Missouri

March 16, 2026

CASSVILLE, MO - March 16, 2026 -
Williams and Sons Custom Construction and Design, a family-operated construction company with over 50 years of experience, has expanded its home additions and renovation services to better serve homeowners throughout Southwest Missouri, including the Jenkins area. The expansion reflects growing demand from homeowners seeking to modify existing properties rather than relocate.

The company, which previously concentrated primarily on custom home construction, has broadened its service offerings to include comprehensive home addition projects ranging from single-room expansions to multi-story additions and detached structures. This strategic expansion allows the company to serve a wider range of clients who wish to adapt their current homes to changing lifestyle needs.

"We recognized that many families in our service area want to stay in their homes but need additional space or updated layouts to accommodate their evolving needs," said Trevor, a company representative for

Williams and Sons Custom Construction and Design. "By expanding our home additions services, we can help these homeowners transform their existing properties while maintaining the quality craftsmanship that has defined our work for five decades."

Williams and sons Home Additions services now encompass a complete range of residential expansion projects, including bedroom additions, home office spaces, expanded kitchens, second-story additions, and detached structures such as garages and pool houses. The company manages every aspect of these projects, from initial design consultations and permit acquisition through construction and final finishing work.

The expansion comes as Southwest Missouri experiences steady residential growth, with many long-term residents choosing to invest in their existing properties rather than purchase new homes. The company's in-house design services enable clients to visualize proposed additions and ensure seamless integration with existing structures.

Williams and sons New Construction projects continue to represent a significant portion of the company's portfolio. The dual focus on new builds and additions positions the company to address diverse client needs, whether homeowners are starting from scratch or enhancing established properties.

"Our hands-on approach remains consistent whether we're building a new custom home or adding a family room to a house that's been in the community for generations," Trevor explained. "We maintain the same standards for timeline adherence, job site cleanliness, and clear communication throughout every project."

The company's service area includes Monett, Golden, Eagle Rock, Shell Knob, Cassville, and surrounding communities in Southwest Missouri. Each project begins with a free consultation where homeowners can discuss their vision and receive professional guidance on feasibility, design options, and project scope.

Williams and Sons Custom Construction and Design has built its reputation on delivering custom homes and construction projects that meet precise client specifications. The family-owned business maintains direct owner involvement in every project, ensuring consistent quality control and client satisfaction. With the expanded focus on home additions, the company continues its commitment to helping Southwest Missouri residents create living spaces that meet their unique needs and preferences.
