

Northwest Plumbing, Heating & AC Announces Enhanced Furnace Repair Services for the New Year

February 11, 2026

DAVENPORT, Iowa - February 11, 2026 -
Northwest Plumbing, Heating & AC, a leading provider of residential heating, cooling and plumbing services in the Quad Cities area, has announced expanded furnace repair and installation capabilities to meet increased demand during the colder months. The company has strengthened its technical team and extended service availability to ensure homeowners maintain reliable heating throughout the winter season.

The expansion comes as the region experiences dropping temperatures and increased service requests for heating system maintenance and repairs. Northwest Plumbing Heating & AC has implemented comprehensive training programs for its technical staff to address various heating system challenges, from routine maintenance to complex furnace replacements.

"As temperatures continue to drop, we recognize the critical importance of reliable heating systems for our community," said Bill Durand, General Manager at Northwest Plumbing, Heating & AC. "Our expanded service capacity ensures that residents can access professional furnace repair and installation services when

they need them most, preventing uncomfortable and potentially dangerous situations during extreme cold weather."

The company's enhanced services encompass repair and installation of high-efficiency furnaces, boiler systems, geothermal heating units, and ductless mini-split systems. Additionally, Northwest Plumbing, Heating & AC continues to provide comprehensive plumbing services year-round, addressing common issues such as drain cleaning, water heater repair, and sewer line maintenance.

To support customers facing unexpected heating system failures, the company has partnered with GreenSky to offer flexible financing options for furnace replacements and major repairs. The company has also introduced Service Partner Agreements starting at $99 annually, which include scheduled maintenance visits and priority service scheduling for both heating and plumbing systems.

Beyond traditional service channels, Northwest Plumbing, Heating & AC maintains an active presence on social media platforms, including Pinterest, where the company shares energy-saving tips, maintenance advice, and home improvement ideas. This digital engagement complements their traditional service offerings and provides valuable resources for homeowners seeking to maintain their heating and plumbing systems.

The timing of this service expansion aligns with industry data showing that heating system failures increase significantly during the first cold snaps of the season, when systems that have been dormant through summer are suddenly called into heavy use. Regular maintenance and prompt repairs can prevent many emergency situations and extend equipment lifespan.

Northwest Plumbing, Heating & AC has been serving the Quad Cities area for over a century, establishing itself as a trusted provider of residential heating, cooling, and plumbing services. As a member of the Nexstar Network, a national organization of independent home service contractors, the company maintains rigorous technical training and operational standards. The company offers 24-hour emergency service and provides free estimates for system replacements.

The recent developments represent part of Northwest Plumbing, Heating & AC's ongoing commitment to serving the Quad Cities community. This news article highlights the company's proactive approach to meeting seasonal demand while maintaining the high service standards that have defined their operations since 1923.
