North Meridian Storage Announces Brand Release and Enhanced Security Features

March 17, 2026

VALLEY CENTER, KS - March 17, 2026 -
North Meridian Storage, a self-storage facility serving Valley Center and surrounding communities, today announced its North Meridian Brand Release alongside enhanced security measures and expanded service offerings designed to meet growing storage demands in the region.

The storage company near Wichita KS has implemented comprehensive security upgrades including enhanced lighting systems, reinforced fencing, and advanced monitoring capabilities throughout its facility. These improvements complement the company's existing gated access system that tracks and records all property entries and exits.

"Storage needs in our community continue to evolve, and we are committed to providing solutions that offer both security and convenience," said Michael Porter, facility manager at North Meridian Storage. "Our enhanced security features represent our dedication to protecting our customers' belongings while maintaining the accessibility they need."

North Meridian Storage offers a comprehensive range of storage solutions including small units starting at $60 per month for household items and personal belongings, medium units from $100 monthly for larger storage needs, and vehicle storage options beginning at $45 for boats, RVs, campers, and trailers. The facility serves Valley Center, Park City, Maize, Sedgwick, and other surrounding areas with convenient access and flexible rental terms.

The company has also introduced digital convenience features including online payment processing and an interactive storage calculator tool that helps customers determine appropriate unit sizes for their specific needs. Customers can now reserve units directly through the company's online platform, streamlining the rental process and reducing wait times.

The facility's security infrastructure incorporates multiple protective measures designed to safeguard stored belongings. Each unit receives individual lighting within the secured perimeter, while the monitored environment provides comprehensive protection for items ranging from household goods and furniture to business documents and recreational vehicles. The controlled access system maintains detailed records of all facility entries and exits, creating an additional layer of accountability and security.

"We understand that choosing a storage facility is about more than just space. It's about trust, security, and peace of mind," added Porter. "Our team focuses on making the entire rental experience as straightforward as possible while maintaining the highest standards of facility security and customer service."

The Valley Center facility continues to expand its service capabilities to accommodate diverse storage requirements from residential and commercial customers throughout the region. The combination of various unit sizes, vehicle storage options, and enhanced security measures positions the facility to address both short-term and long-term storage needs for the community.

North Meridian Storage operates as a division of Eden's Property Management LLC, providing secure self-storage solutions throughout the Valley Center region. The company specializes in offering various unit sizes and vehicle storage options with a focus on security, accessibility, and customer service. The facility maintains comprehensive security protocols including fenced perimeters, controlled gate access, and continuous monitoring systems to ensure the protection of stored belongings.
