

HHI Windows and Doors Announces New Showroom Grand Opening

February 06, 2026

BLUFFTON, SC - February 06, 2026 -

HHI Windows and Doors announced the opening of its newly renovated showroom?an experience-driven space for homeowners, builders, and design professionals.

?

The showroom, located at 32 Malphrus Rd, Unit 117, Bluffton, SC 29910, will be open to the public beginning with a planned grand opening on February 28, 2026, followed by a ribbon-cutting ceremony with the Hilton Head Island-Bluffton Chamber of Commerce on March 2, 2026, to formally introduce the expanded space and its role as a regional resource for window and door options.

?

The planned grand opening on February 28, 2026, will provide the public with an overview of the entire showroom experience with team members ready to guide guests through feature areas, answer product questions, and explain installation processes. The chamber?s ribbon-cutting ceremony on March 2, 2026, will formally acknowledge the upgraded showroom's debut and its significance to the Bluffton community and the larger service region.

?

The HHI Windows and Doors showroom grand opening events will provide an immersive look at how the

company is elevating in-person product evaluation and project planning. Guests will be able to explore full-size window and door displays, see working models, and review real material samples in a layout that mirrors real-world applications.

?

HHI Windows and Doors? new showroom symbolizes the company?s sustained expansion since its founding in 2010 (originally Holliday Home Improvements), as well as its ongoing commitment to providing replacement windows, doors, and reliable installation services to Bluffton, Hilton Head Island, Beaufort, Okatie, Ridgeland, Hardeeville, and neighboring communities.

?

Visitors to the HHI Windows and Doors showroom opening may expect to find a carefully curated selection of quality window and door solutions from the company?s renowned partner brands. The showroom is designed to allow guests to experience full-size displays and working models up close, including operating windows, entry doors, patio doors, and other systems that demonstrate real-world performance and use.

?

By organizing products so that styles, finishes, and design details can be compared side-by-side, the space supports more confident selections for both new construction and renovation projects. The entry and vestibule areas set the tone for the updated showroom and are central features of the HHI Showroom Grand Opening. An impressive pivot door from Western Window Systems, a ProVia entry door, and iron sidelights add craftsmanship and architectural significance to this area. The arrangement shows how a statement entry system can improve curb appeal and design continuity, helpful for property owners considering front door changes.

?

Window displays are a key part of the HHI Showroom Grand Opening experience. Interactive exhibitions showcase performance, functionality, and aesthetic alternatives across multiple product lines, such as varied operating modes, frame materials, and glass combinations. By seeing these windows in motion and at full scale, visitors can gain a clearer understanding of how ventilation, natural light, energy efficiency, and sightlines can vary by product, which is particularly relevant in coastal Carolina homes.

?

Complementing the window area, dedicated door displays present a broad range of entry and interior door options at real-world scale. Guests can examine finishes, hardware, panel patterns, and glass inserts to learn how material selection and construction affect longevity and upkeep. This section links visual preferences to performance to inform design decisions.

?

Besides the window and door displays, the new showroom also features ?The Lab,? a hands-on design zone intended for further investigation and future growth. The Lab is centered on a ProVia window wall that shows casement and awning systems, giving visitors a close-up look at how larger windows can be organized for function and beauty. Interior doors, closet systems, and custom millwork, as well as cabinetry, tile, and wallpaper elements, are among the planned upgrades, positioning The Lab as a hub for developing and

refining full design concepts.

?

To support detailed project discussions, the showroom incorporates a dedicated conference room that will be active during the HHI Showroom Grand Opening. This space is intended for consultations, plan reviews, and private client appointments, allowing HHI Windows and Doors staff to walk through drawings, specifications, and timelines in a focused environment.

?

Behind the public-facing areas, office spaces have been organized to reinforce collaboration and client service. Individual offices and an employee conference room support coordination among sales, project management, and installation teams, helping ensure that insights from showroom consultations carry through to field execution.

?

Guests at the HHI Showroom Grand Opening will also have access to a lounge area designed as a comfortable hospitality space within the showroom. The lounge gives visitors a place to pause, review samples, and discuss options with family members or project partners as they move through the different displays. This setting reflects the company?s emphasis on providing a relaxed, informative environment where window and door decisions can be made thoughtfully and at an appropriate pace.

?

Homeowners, contractors, architects, and community members are invited to visit the new showroom to experience and learn more about window and door solutions. For additional information or to schedule a consultation, visit hhiwindows.com or contact HHI Windows and Doors at (843) 689-2140.
