Best Way to Learn Language, which is based in New York, New York, has recently released an updated review of the Rocket Spanish Program. Rocket Spanish is a program that is part of the online language programs known as Rocket Languages. It is designed to help people learn Spanish in the comfort of their homes. Best Way to Learn Language spokesperson Holly Sparks states, "Our reviews are all designed to give people the pros and cons of language programs. We chose this one because it teaches Spanish, which is quickly becoming a popularly spoken language around the world."

The review, which can be seen in full at <http://www.bestwaytolearnlanguage.com/rocket-spanish/>, provides information related to cost, the effectiveness of the course in teaching Spanish, and provides testimonials from people who have actually purchased and used the program.

The review lists the benefits of learning the Spanish language, and states that learning a new language can often be "time consuming and costly," saying that one reason many consumers turn to online learning is to save money and to have the ability to learn at their own pace. It then goes into detail about Rocket Languages and provides specific examples of the benefits of their Spanish program. Among the list of benefits, which can be seen in their entirety at <http://www.bestwaytolearnlanguage.com/learn-to-speak-spanish/>, it states that the Rocket Languages program is one of the highest rated programs currently available online.

The newly updated review states that the Rocket Languages Spanish program uses a learning process that is known as chunking. It explains that chunking, "breaks language into manageable 'chunks' that make it much easier for your brain to process and store." The review states that this is the best way to learn as each lesson builds on the lesson preceding it, and that program users can progress as fast or as slowly as they want, which offers the most benefit over other programs.

Best Way to Learn Languages offers reviews on a number of online language teaching programs. Those interested in learning more about the review provider or reading through their various reviews of this or other
