

Amana Care Clinic Announces Enhanced Walk-In Medical Services for Davenport Region

February 18, 2026

DAVENPORT, Iowa - February 18, 2026 -
Amana Care Clinic has announced enhanced walk-in medical services across its three Iowa locations in Davenport, Bettendorf, and Muscatine to address increased patient demand during the winter respiratory illness season. The announcement comes as healthcare facilities across the Quad Cities region report higher patient volumes for non-emergency medical treatment.

The clinic provides health care services for a range of conditions, including upper respiratory infections, ear infections, urinary tract infections, minor lacerations, sprains, and fractures. Additional services include sports physicals, wound care follow-up, and specialized procedures such as fishhook removal. Each location maintains full laboratory services and X-ray imaging capabilities.

The clinic has implemented extended diagnostic capabilities and streamlined patient intake processes to reduce wait times for walk-in patients seeking treatment for seasonal illnesses and minor injuries. The enhancements include upgraded laboratory equipment and digital X-ray technology at all three locations,

along with an online check-in system that allows patients to reserve appointment slots before arrival.

"We have enhanced our diagnostic capabilities and staffing levels to meet the increased demand for walk-in medical services during the winter months," said Moutaz Kotob, PhD, Medical Director at Amana Care Clinic. "Our medical staff can diagnose and treat conditions ranging from respiratory infections to minor fractures, providing an alternative to emergency department visits for non-life-threatening conditions."

Amana Care Clinic Quad Cities walk-in medical care operates without appointment requirements, allowing patients to receive treatment for acute medical conditions on a same-day basis. The clinic treats patients of all ages, from pediatric cases involving common childhood illnesses to adult patients requiring treatment for work-related injuries or seasonal health concerns.

According to Iowa Department of Public Health data, demand for urgent care services has increased 15 percent statewide over the past year, with particular growth in walk-in medical facilities that offer extended hours and weekend availability. The trend reflects patient preferences for accessible medical care without the scheduling constraints of traditional primary care appointments.

"The enhancements to our facilities and services reflect the evolving healthcare needs of the Quad Cities community," added Dr. Kotob. "By maintaining comprehensive diagnostic equipment and experienced medical staff at each location, we can provide timely medical care when patients need it most."

Amana Care Clinic Davenport urgent care services include treatment for conditions that require immediate attention but do not constitute medical emergencies. The clinic's medical professionals follow evidence-based treatment protocols for diagnosing and treating acute illnesses and injuries. Laboratory testing capabilities include blood work, urinalysis, rapid strep testing, and influenza screening.

The clinic's medical team includes physicians, nurse practitioners, and physician assistants certified in urgent care medicine. Staff members maintain current certifications in Advanced Cardiac Life Support and Pediatric Advanced Life Support protocols.

Amana Care Clinic operates walk-in medical facilities in Davenport, Bettendorf, and Muscatine, Iowa, providing non-emergency medical services to the Quad Cities region. The clinic offers comprehensive diagnostic services including laboratory testing and X-ray imaging for patients seeking treatment without appointments. Medical services encompass treatment for acute illnesses, minor injuries, and preventive care including sports physicals.
