

Mindmachines.com Announces Major Roshiwave Mind Machine Upgrade with Revolutionary pROSHI 3 Emulation

February 19, 2026

Dallas, Texas - February 19, 2026 -
Mindmachines.com announces the upcoming release of a significant upgrade to its Roshiwave mind machine product line, introducing the previously unreleased pROSHI 3 emulation model scheduled for February 2026. This enhancement represents the completion of the comprehensive personal ROSHI technology collection, bringing a never-before-available model to meditation and brainwave entrainment practitioners worldwide.

The pROSHI 3, internally codenamed "ZEN," was originally designed and optimized for the ROSHI 3D experience but was never released to the public. Only two confirmed prototypes of this personal ROSHI model existed until now. The discovery and successful emulation of this lost technology marks a milestone in preserving and advancing ROSHI brainwave entrainment methodologies.

"The addition of the pROSHI 3 emulation truly completes our mission to preserve and make accessible the entire personal ROSHI universe," said Fred Williams, Director of Product Development at

Mindmachines.com. "This model represents a masterpiece of ROSHI technology that practitioners have never had the opportunity to experience. We're bringing this lost innovation to everyone who can benefit from advanced brainwave entrainment."

The new pROSHI 3 emulation includes several advanced features: classic default pROSHI 3 in both positive and negative phases, pROSHI 3 3D modes in multiple color combinations, pROSHI 3 HD mode, new Roshiwave XD modes utilizing pROSHI 3 modeling, an all-new ROSHI SEQ mode containing all five ROSHI models in sequence, and experimental OGDEN protocols in two modes across both phases.

Since its launch in summer 2019, the Roshiwave has evolved significantly, adding additional models and modes while maintaining its position as the only true pROSHI emulation device available. The device has received validation from Dr. Victoria Ibric and numerous members of the ROSHI clinical community, confirming its accuracy in representing personal ROSHI technology.

The Roshiwave functions as a digital compass for the brain, gently normalizing brainwaves and guiding users to a sublime meditative state beyond the perception of time without conscious effort. The device uses a process called Dynamic Neuro-Activation to dis-entrain abnormal brainwave frequencies and quiet the mind, leading users to profound states of peace and relaxation.

The significance of this upgrade extends beyond technical innovation. Prior to Roshiwave's introduction, older pROSHI devices commanded two to three times their original purchase price in the secondary market due to scarcity and demand. The Roshiwave now makes all five personal ROSHI models available at a cost far less than even one of the original devices.

Mindmachines.com is an online distributor of brain machines, brainwave entrainment technology, AVS stimulation devices, EEG neurofeedback equipment, and meditation machines. The company serves as the worldwide distributor of the Roshiwave self-meditation device, which has become instrumental in making ROSHI technology accessible to clinicians, researchers, and individual users seeking enhanced meditation and mental performance capabilities. The Roshiwave mind machine is currently available exclusively through the mindmachines.com website.
