

Best Rated Elliptical Machines Releases New Review Of Yowza Fitness Islamorada

April 04, 2016

April 04, 2016 - PRESSADVANTAGE -

Best Rated Elliptical Machines, which is a go to source for information on fitness equipment, has recently released a new review that covers the Yowza Fitness Islamorada elliptical trainer machine. The review, which has already raised a lot of interest, can be accessed through <http://www.bestratedellipticalmachines.com/reviews/yowza-fitness-islamorada/>.

Alison Fox from Best Rated Elliptical Machines says: "Elliptical machines are all the rage these days. One reason for this is that the machine offers a low impact workout with the feet never leaving the pedal. Many baby boomers have joint problems and ellipticals are a good alternative for them. Many reviewers are sold on the Yowza Islamorada elliptical. Needless to say, we felt we had to take a look at it as well."

Best Rated Elliptical Machines, as can be seen on their website at <http://www.bestratedellipticalmachines.com>, is committed to empowering people to find their own fitness equipment. They aim to find products for them that fit not just their personal lifestyle, but also their budget. As such, they have reviewed a wealth of products, giving their honest opinion at all times.

The Yowza Fitness Islamorada review highlights the specific features of the machine, including its drive mechanism, pivotal pedal design, S.U.R.E. technology, cutting edge technology, display technology, and weight management technology. They found the noise level to be very low, as is expected with a high end design. The only downside that they found is that the machine is quite heavy, making it impossible for one person to set it up on its own. However, the weight is reflective of the high quality materials, which should be expected of a device of its price category.

People are also encouraged to like the Best Rated Elliptical Machines' Facebook page on <https://www.facebook.com/BestEllipticals>. "We will use our Facebook page to share new reviews and other pieces of product information," adds Alison Fox. "We also want to encourage people to use the Facebook page to communicate with us and others who have read our reviews, discussing their own findings when using any of the devices that we have reviewed. We can learn so much from them."
