

Mindmachines.com Unveils Mind Optimization Machine with Advanced pROSHI 3 Emulation

February 27, 2026

Dallas, Texas - February 27, 2026 -
Mindmachines.com has announced an upgrade to its Roshiwave product line, introducing the previously unreleased pROSHI 3 emulation model scheduled for release in February 2026. The enhancement represents a significant milestone in brainwave entrainment technology, completing the preservation of the entire personal ROSHI universe for clinicians, researchers, and individual users seeking advanced meditation and mental performance capabilities.

The pROSHI 3, internally codenamed ZEN, was originally designed for the ROSHI 3D experience but never reached public release until now. The successful discovery and emulation of this technology adds substantial new capabilities to the Roshiwave system, which has served as the industry standard for ROSHI technology emulation since its launch in summer 2019.

"The addition of the pROSHI 3 emulation completes our mission to preserve and make accessible the entire personal ROSHI universe," said Fred Williams, spokesperson from Mindmachines.com. "This advancement

ensures that these powerful brainwave entrainment methodologies remain available for future generations of practitioners and users seeking enhanced mental clarity and meditation capabilities."

The enhanced mind optimization machine incorporates several advanced features within the pROSHI 3 emulation. Users gain access to classic default pROSHI 3 in both positive and negative phases, pROSHI 3 3D modes in multiple color combinations, and pROSHI 3 HD mode. The update also introduces new Roshiwave XD modes utilizing pROSHI 3 modeling and an all-new ROSHI SEQ mode containing all five ROSHI models in sequence. Additionally, experimental OGDEN protocols are now available in two modes across both phases.

The device utilizes a process called Dynamic Neuro-Activation to dis-entrain abnormal brainwave frequencies and quiet the mind. Through photostimulation, specially calibrated flickering light travels through the eyes and into the brain, freeing the mind from unhealthy cyclical patterns. This process helps individuals achieve peak performance, enhanced meditation, accelerated learning, and improved sleep quality.

The technology has received validation from Dr. Victoria Ibric and numerous members of the ROSHI clinical community, confirming its accuracy in representing personal ROSHI technology. The mindmachine functions as a digital compass for the brain, normalizing brainwaves and guiding users to a meditative state beyond the perception of time without conscious effort.

The Roshiwave has evolved significantly since its inception, adding additional models and modes while maintaining its position as the only true pROSHI emulation device available. The system enables users to achieve a meditative state similar to that of a Zen master, helping them cope with daily stresses and enhance their mental performance.

Mindmachines.com is an online distributor of brain machines, brainwave entrainment technology, AVS stimulation devices, EEG neurofeedback equipment, and meditation machines. The company serves as the worldwide distributor of the Roshiwave self-meditation device, which has become instrumental in making ROSHI technology accessible to clinicians, researchers, and individual users seeking enhanced meditation and mental performance capabilities.
