

Love ESports Expands Golf Cart Dealer Inventory to Meet Growing Demand for Electric Vehicles

February 25, 2026

HOMOSASSA, FL - February 25, 2026 - PRESSADVANTAGE -

Love ESports, a Homosassa-based electric vehicle dealership, has expanded its inventory of electric golf carts and low-speed vehicles in response to increased regional demand for sustainable transportation alternatives. The expansion includes a broader selection of both new and used models from leading manufacturers including Cricket, GEM, Honor, Icon, Cushman, Tomberlin, and EZGO.

The dealership's strategic inventory expansion comes as market analysis indicates growing consumer interest in electric vehicles for both recreational and practical transportation needs throughout central Florida. As a golf cart dealer in Citrus County, Florida, Love ESports has positioned itself to serve customers seeking alternatives to traditional gas-powered vehicles for community transportation, recreational activities, and commercial applications.

"The demand for electric vehicles has shifted significantly over the past year, with more customers recognizing the practical benefits and cost savings these vehicles offer," said Chad Halleen, owner of Love ESports. "We've expanded our inventory to ensure customers have access to a comprehensive selection of electric vehicles, from golf carts to electric motorcycles and scooters, all backed by our full-service support."

The dealership maintains one of the region's most diverse electric vehicle inventories, featuring used Cricket golf carts in Florida alongside new models from multiple manufacturers. Cricket's RX5 Mini Golf Cart lineup, including both standard and lithium battery models, represents a significant portion of the pre-owned inventory, offering customers budget-friendly entry points into electric vehicle ownership.

Love ESports differentiates itself through comprehensive support services beyond vehicle sales. The dealership provides financing options, including zero percent financing on select models, making electric vehicle ownership more accessible to a broader customer base. Their service department, staffed by trained technicians, handles routine maintenance and complex repairs for all brands they carry, ensuring long-term vehicle reliability.

The expansion also encompasses the dealership's parts and accessories department, which stocks components for all major electric vehicle brands. This comprehensive approach ensures customers can maintain and customize their vehicles without seeking multiple service providers.

"Our commitment extends beyond the initial sale to encompass the entire ownership experience," added Halleen. "From financing assistance to ongoing service and parts availability, we've structured our operations to provide complete support for electric vehicle owners throughout Florida."

The timing of Love ESports' inventory expansion aligns with broader transportation trends across Florida, where communities increasingly embrace low-speed electric vehicles for local transportation. Golf carts, electric scooters, and neighborhood electric vehicles have become common sights in residential communities, beach towns, and commercial districts throughout the state.

Love ESports operates from its Homosassa facility, serving customers throughout central Florida. The dealership specializes in electric motorcycles, bicycles, scooters, golf carts, and side-by-side UTVs, offering both new and pre-owned options. Their showroom allows customers to view and test various models before making purchase decisions. The company's service department provides comprehensive maintenance and repair services, while their parts department maintains extensive inventory for all carried brands.
