

Keathley Landscaping Expands Yard Drainage and Sod Installation Services Across North Texas

March 03, 2026

GARLAND, TX - March 03, 2026 -
Keathley Landscaping, a leading landscape and drainage specialist serving the Dallas-Fort Worth metroplex, announces the expansion of its comprehensive drainage and landscaping services to address increasing water management challenges faced by North Texas property owners.

The expansion comes as North Texas continues to experience irregular rainfall patterns and extreme weather events that create significant drainage challenges for residential and commercial properties. The company's enhanced service offerings combine advanced drainage system design with comprehensive landscape restoration, including professional sod installation and custom stonework.

"North Texas property owners face unique challenges with water management due to our heavy clay soils and unpredictable weather patterns," said Logan Keathley, owner and NDS Certified Drainage Contractor at Keathley Landscaping. "We've developed comprehensive solutions that not only address immediate drainage problems but also prevent future landscape damage and protect home foundations from costly water-related

issues."

The company's drainage services encompass French drain installation, comprehensive grading solutions, and custom-designed buried drainage pipe systems tailored to each property's specific challenges. These services prove particularly critical in North Texas, where heavy clay soils prevent proper water absorption and create conditions that can damage both landscapes and home foundations.

Keathley Landscaping has observed a significant increase in requests from property owners experiencing repeated lawn failures and persistent water accumulation issues. Many of these problems stem from inadequate initial landscape planning that failed to account for proper drainage, leading to costly remediation needs that could have been prevented with proper initial installation.

The expanded services also address the aesthetic aspects of drainage solutions through custom stonework and hardscape installations that complement drainage systems while enhancing property appearance. From natural flagstone to modern pavers, retaining walls to flowerbed borders, the company integrates functional drainage elements with visually appealing landscape features.

"Property owners often don't realize that proper drainage is the foundation of a healthy landscape," added Keathley. "By combining our drainage expertise with complete landscape transformation services, we create outdoor spaces that are both beautiful and sustainable, eliminating the cycle of repeated lawn failures and water damage."

The company's comprehensive approach includes thorough property evaluations to understand unique landscape characteristics, soil conditions, and water flow patterns before developing customized solutions. This methodology ensures that each drainage system installation addresses the specific challenges of individual properties while maintaining aesthetic appeal.

Keathley Landscaping has been serving the North Texas region since 2002, providing comprehensive landscaping solutions throughout Dallas, Garland, Wylie, Plano, and surrounding communities. The company specializes in complete landscape transformations, offering services that include landscape design and installation, outdoor kitchen construction, patio covers, fence repair and installation, tree services, and landscape lighting systems. As an NDS Certified Drainage Contractor, the company maintains the highest industry standards for drainage system design and installation, ensuring long-term effectiveness and property protection.
