

Go Industries Expands OEM Custom Manufacturing and Fabrication Services for Diverse Industry Applications

March 05, 2026

Richardson, TX - March 05, 2026 -
Go Industries, a Texas-based manufacturer with over 40 years of experience, has expanded its custom manufacturing and fabrication services to meet growing demand across multiple industrial sectors. The company now offers enhanced capabilities including precision manufacturing for AI data center server racks, advanced tube services, comprehensive sheet metal fabrication, and certified welding services.

The expansion encompasses a broad range of manufacturing capabilities designed to serve industries from automotive and telecommunications to medical and defense sectors. The company's two state-of-the-art facilities in Texas have been equipped with advanced machinery and tooling to provide cost-effective solutions with competitive pricing and quick turnaround times.

"Our expanded manufacturing capabilities position us to meet the evolving needs of industries requiring precision fabrication and custom solutions," said a Go Industries spokesperson. "From AI data center

infrastructure to specialized equipment for public safety divisions, we're equipped to handle projects of varying complexity and scale."

The expanded services include CNC tube bending, rolling, end forming, and sawing for tube fabrication needs. Sheet metal capabilities encompass bending, shearing, notching, punching, robotic welding, laser cutting, and plasma cutting. Additional services include design and engineering support, assembly, packaging, chrome plating, powder coating, pipe profiling, and certified welding to D1.1, B31.1, and B31.3 standards.

The company's manufacturing facilities feature a high-capacity powder coating line and batch oven for finishing products, along with an extensive inventory of tooling and machinery. These resources enable the company to provide comprehensive solutions from initial design through final delivery.

Go Industries services a diverse client base spanning automotive, cable and wire, commercial equipment, emergency equipment, defense, Department of Transportation, gas, medical, oil, public safety divisions, sport and fitness, transportation safety equipment, and telecommunications sectors. The company also offers private label programs for businesses seeking to bring their own branded products to market.

The expansion comes at a time when many industries are seeking domestic manufacturing partners capable of delivering quality products with shorter lead times. The addition of precision manufacturing capabilities for AI data center server racks reflects the company's response to emerging technology infrastructure needs.

"With four decades of manufacturing expertise, we understand the importance of adapting to industry trends while maintaining the quality and reliability our clients expect," added the Go Industries spokesperson. "Our expanded capabilities allow us to serve as a single-source solution for companies requiring everything from prototype development to full-scale production."

Established in 1978, the company has built its reputation on providing truck accessories, law enforcement equipment, and custom manufacturing services. The company holds Platinum Status with SEMA, reflecting its commitment to service and product quality. All products are engineered and manufactured in Texas, ensuring quality control and rapid response to customer needs.
