

Go Industries Inc Expands Custom OEM Manufacturing Services to Meet Growing Industrial Demand

March 09, 2026

Richardson, TX - March 09, 2026 -
Go Industries Inc, a Texas-based manufacturer with over four decades of experience, has announced the expansion of its custom OEM manufacturing and fabrication services to address increasing demand across multiple industrial sectors. The expansion encompasses enhanced precision manufacturing capabilities, including specialized production for AI data center server racks, comprehensive tube services, and advanced sheet metal fabrication.

The Richardson, Texas company has equipped its two state-of-the-art facilities with advanced machinery and tooling to provide expanded services that now include CNC bending, rolling, end forming, and sawing for tube applications. Sheet metal capabilities have been enhanced to include bending, shearing, notching, punching, robotic welding, and both laser and plasma cutting. The company also offers certified welding services meeting D1.1, B31.1, and B31.3 standards.

"The expansion of our fabrication services reflects the evolving needs of our industrial clients who require

domestic manufacturing partners capable of delivering quality products with shorter lead times," said a Go Industries Inc spokesperson. "Our precision manufacturing capabilities are particularly critical for AI data center infrastructure projects, where server rack specifications demand exact tolerances for proper equipment integration and cooling system efficiency."

The expanded services are designed to serve a diverse range of industries, including automotive, telecommunications, medical equipment, defense, emergency equipment, and public safety divisions. The company's manufacturing approach allows clients to scale production efficiently while maintaining competitive pricing and quick turnaround times.

Go Industries Inc has incorporated advanced technology throughout its manufacturing processes, including the recent addition of Mitsubishi BB6020 Press Brakes that provide accuracy levels of ±1 micron. This level of precision is essential for meeting the stringent requirements of original equipment manufacturers across various sectors.

The company's comprehensive service offering extends beyond manufacturing to include design and engineering support, assembly, packaging, chrome plating, powder coating, and pipe profiling. This integrated approach allows clients to consolidate their supply chain while maintaining quality control throughout the production process.

"Our ability to provide custom OEM manufacturing solutions from concept to delivery sets us apart in the marketplace," added the Go Industries Inc representative. "Whether clients need prototype development or full-scale production runs, our facilities and expertise can accommodate projects of varying complexity and scale."

The expansion positions Go Industries Inc to better serve industries experiencing rapid growth, particularly the telecommunications and AI infrastructure sectors where demand for precision-manufactured components continues to accelerate. The company also offers private label programs for businesses seeking to bring their own branded products to market.

Established in 1978, Go Industries Inc has built its reputation on delivering quality manufacturing solutions across multiple industries. The company holds Platinum Status with SEMA (Specialty Equipment Market Association), reflecting its commitment to service excellence and product quality. Operating from its Texas facilities, the company combines traditional manufacturing expertise with modern technology to meet the evolving needs of industrial clients throughout North America.
