

## **QBM Expands Façade Portfolio with Addition of ROCKWOOL Rockpanel Cladding Solutions**

*February 25, 2026*

DUBLIN, D13 - February 25, 2026 - PRESSADVANTAGE -

QBM, a leading roofing and building materials supplier in Ireland, has announced the addition of ROCKWOOL Rockpanel to its comprehensive façade portfolio. The partnership brings innovative cladding solutions to Irish architects, specifiers, and construction professionals, offering enhanced design flexibility and performance for modern building projects.

The new product line combines durability with creative versatility, providing construction professionals across Ireland with access to high-performance cladding materials that meet the evolving demands of contemporary architecture. ROCKWOOL Rockpanel represents a significant expansion of QBM's existing façade offerings, reinforcing the company's commitment to providing quality building materials to the Irish market.

"The addition of ROCKWOOL Rockpanel to our portfolio represents an important milestone in our ongoing commitment to offering Irish construction professionals the highest quality building materials available," said a spokesperson for QBM. "This partnership allows us to provide our clients with access to innovative façade

solutions that combine exceptional performance with remarkable design possibilities."

ROCKWOOL Rockpanel products are manufactured from natural volcanic stone and are available in over two hundred color options, providing architects and designers with extensive creative freedom for façade applications. The material's unique properties allow panels to be faceted, curved, and shaped to accommodate complex architectural concepts, making it suitable for projects ranging from commercial developments to residential buildings.

The cladding system addresses growing industry demands for building materials that deliver both aesthetic appeal and long-term performance. The natural composition of the panels provides inherent durability characteristics, while the extensive color range and formability enable architects to realize ambitious design visions without compromising on material performance standards.

QBM's technical team will provide comprehensive support to clients working with the new product line, offering guidance on product selection, application methods, and project-specific requirements. The company has established processes for providing material samples to professionals interested in evaluating the product's finish and quality characteristics for upcoming projects.

The partnership with ROCKWOOL reflects QBM's strategic approach to portfolio development, focusing on products that address specific needs within the Irish construction market. The company has built its reputation on providing reliable access to quality building materials, backed by technical expertise and customer support services.

Irish construction professionals can now access the complete range of ROCKWOOL Rockpanel products through QBM's established distribution channels. The company maintains its headquarters in Dublin and serves clients throughout Ireland, providing both product supply and technical consultation services to support successful project outcomes.

The façade cladding market has experienced significant evolution in recent years, with increased emphasis on materials that offer both performance and design flexibility. ROCKWOOL Rockpanel's combination of natural stone composition, extensive color options, and formability positions it as a relevant solution for contemporary construction projects facing these dual requirements.

QBM continues to evaluate additional products and partnerships that align with market needs and the company's quality standards. The addition of ROCKWOOL Rockpanel follows the company's established pattern of introducing materials that provide tangible value to construction professionals while maintaining the performance characteristics required for demanding applications.

Construction professionals interested in learning more about ROCKWOOL Rockpanel products or requesting material samples can contact QBM's technical team. The company provides detailed product information and application guidance to support informed material selection decisions for façade projects of varying scales and complexity.
