

AccuTemp Cooling and Heating Emphasizes Preventive HVAC Maintenance for Shreveport Businesses Before Peak Season

March 18, 2026

Shreveport, Louisiana - March 18, 2026 -
AccuTemp Cooling and Heating, a commercial HVAC contractor serving the Shreveport area since 2004, is reminding local businesses about the critical importance of preventive maintenance as temperatures begin rising across Louisiana. The company reports increased service calls from businesses experiencing system failures that could have been prevented through regular maintenance schedules.

With summer approaching and commercial cooling systems preparing for their heaviest usage period, AccuTemp Cooling and Heating is highlighting the significant cost savings and operational benefits that businesses can achieve through proactive HVAC system care. The company's licensed and certified heating and cooling engineers have documented that regular maintenance can reduce emergency repair calls by up to 40 percent while extending equipment lifespan by several years.

"Commercial HVAC systems in our region face unique challenges due to Louisiana's humid climate and extended cooling season," said Duane Simpson, senior HVAC specialist at AccuTemp Cooling and Heating. "We see too many businesses waiting until their systems fail completely before calling for service, which often

results in costly emergency repairs and business disruptions during the hottest months when reliable cooling is essential."

The company's commercial maintenance programs include comprehensive system inspections, filter replacements, coil cleaning, refrigerant level checks, and electrical component testing. These preventive measures help identify potential issues before they develop into major problems requiring extensive repairs or complete system replacement.

AccuTemp Cooling and Heating provides HVAC services for Shreveport, LA and surrounding communities including Bossier City, Haughton, Stonewall, Princeton, Oil City, Mooringsport, and Kiethville. The company's 24/7 emergency service availability ensures that businesses experiencing unexpected system failures can receive immediate assistance to minimize operational disruptions.

Beyond routine maintenance and repairs, AccuTemp Cooling and Heating offers comprehensive services including air conditioning installation, heating system maintenance, advanced carbon monoxide detection systems, and backup generator installation. The company's Better Business Bureau A+ rating reflects its commitment to quality service and customer satisfaction throughout LA.

"Energy efficiency remains a top concern for commercial property owners and managers," added Simpson. "Regular maintenance not only prevents breakdowns but also ensures systems operate at peak efficiency, which translates directly into lower utility costs. We've helped numerous local businesses reduce their energy consumption by simply maintaining their existing equipment properly."

The company's team of engineers can design customized HVAC solutions for businesses with unique requirements, from small retail spaces to large industrial facilities. All work performed by AccuTemp Cooling and Heating is backed by a 12-month parts and labor warranty.

AccuTemp Cooling and Heating has served the Shreveport business community for nearly two decades, combining more than 40 years of collective HVAC experience among its technical staff. The company uses materials from leading manufacturers to ensure long-lasting, energy-efficient systems that meet the demanding requirements of commercial applications. As a locally owned and operated business, AccuTemp Cooling and Heating understands the specific climate challenges faced by area businesses and provides solutions tailored to regional conditions.
