

Yeoman Service Center Strengthens Local Auto Care With Expanded Repair Services

March 05, 2026

NEW HAVEN, IN - March 05, 2026 -
Yeoman Service Center has reinforced its commitment to comprehensive automotive care in New Haven, Indiana, by maintaining an extensive range of repair services designed to meet the diverse needs of local vehicle owners. The ASE-certified and AAA-approved facility continues to provide specialized repair solutions for multiple vehicle brands while expanding its technical capabilities to include advanced diagnostic services.

The automotive repair facility offers comprehensive services spanning 23 distinct repair categories, from routine maintenance to complex engine and transmission work. Yeoman Service Center in New Haven has positioned itself as a single-source solution for drivers seeking reliable automotive care, eliminating the need to visit multiple specialists for different vehicle issues.

"Our approach has always been to provide complete automotive solutions under one roof," said Donny Yeoman, owner of Yeoman Service Center. "By maintaining expertise across all major vehicle systems and brands, we ensure that local drivers have access to professional repair services without having to travel far

from home. This comprehensive service model allows us to address everything from basic oil changes to complex ADAS calibration procedures."

The facility's service portfolio encompasses specialized repair capabilities for ten major automotive brands including Audi, Cadillac, Chevrolet, Dodge, Ford, Honda, Jeep, Lexus, RAM, and Toyota. This brand-specific expertise ensures that each vehicle receives service tailored to manufacturer specifications and requirements.

Beyond brand-specific repairs, the center addresses critical vehicle systems including engine repair, transmission service, brake systems, suspension components, electrical systems, and air conditioning. The addition of ADAS calibration services reflects the facility's adaptation to modern vehicle technology, ensuring that advanced driver-assistance systems function correctly after repairs or replacements.

Yeoman Service Center also provides essential maintenance services that help prevent costly repairs and extend vehicle life. These preventive services include oil changes, fluid flushes, brake inspections, tire services, wheel alignments, and comprehensive diagnostic evaluations. Check engine light diagnostics help identify issues before they develop into major problems, supporting the facility's preventive maintenance philosophy.

Fleet repair services represent another dimension of the center's capabilities, supporting local businesses that depend on multiple vehicles for their operations. This service ensures minimal downtime for commercial vehicles, helping businesses maintain productivity while managing vehicle maintenance costs effectively.

The facility operates from two strategic locations, with the New Haven center complementing its Fort Wayne location to provide convenient access for residents throughout the region. This dual-location strategy ensures that comprehensive automotive care remains accessible to a broader customer base while maintaining consistent service quality across both facilities.

Yeoman Service Center's decades of experience in the automotive repair industry have established the company as a trusted resource for vehicle owners seeking reliable, professional service. The combination of ASE certification and AAA approval demonstrates the facility's adherence to industry standards and commitment to quality workmanship. Through its comprehensive service offerings and technical expertise, the company continues to serve as an essential automotive care provider for the New Haven community and surrounding areas.
