

## **Love ESports Expands Golf Cart Dealer Network To Meet Increasing Demand**

*April 17, 2026*

HOMOSASSA, FL - April 17, 2026 - PRESSADVANTAGE -

Love ESports, a Florida-based electric vehicle dealership, has expanded its service area to better serve customers seeking electric vehicles throughout the Tampa Bay region. The Homosassa-based dealership now provides enhanced access to its comprehensive inventory of electric golf carts, motorcycles, bicycles, scooters, and utility vehicles for customers across central and west Florida.

The expansion addresses growing demand for electric transportation alternatives in the Tampa Bay area, where both residential communities and commercial operations increasingly rely on electric vehicles for daily transportation needs. As a golf cart dealer in Tampa, Love ESports brings extensive experience in matching customers with appropriate electric vehicle solutions from leading manufacturers.

"The Tampa Bay market has shown tremendous interest in electric vehicle options, particularly for community transportation and recreational use," said Chad Halleen, owner of Love ESports. "Our expanded service area allows us to better support customers who are transitioning to electric vehicles, whether they need golf carts for their communities, electric bicycles for recreation, or utility vehicles for commercial applications."

Love ESports carries electric vehicles from established manufacturers including Atlas, GEM, Honor, Icon, Cushman, Tomberlin, Cricket, and EZGO. The dealership maintains both new and pre-owned inventory to accommodate various budget requirements and usage scenarios. Each vehicle undergoes inspection and preparation before delivery to ensure optimal performance and reliability.

The dealership specializes in Tomberlin electric vehicles for sale in Florida, offering multiple models designed for different applications. Tomberlin vehicles, known for their durability and advanced features, serve both recreational and utility purposes in residential communities, resorts, and commercial facilities throughout the state.

Beyond vehicle sales, Love ESports provides comprehensive support services including financing options, parts and accessories, and professional service and repair. The dealership's service department employs trained technicians who perform routine maintenance and complex repairs on all brands carried in the showroom.

"Electric vehicle technology continues to advance rapidly, and customers deserve access to knowledgeable dealers who understand these innovations," noted Halleen. "Our team stays current with manufacturer updates and industry developments to provide informed guidance throughout the purchase process and ongoing ownership experience."

The expansion comes as Florida communities increasingly adopt electric vehicles for local transportation. Golf carts and low-speed electric vehicles have become standard transportation methods in many planned communities, while electric bicycles and scooters serve urban areas seeking sustainable mobility solutions.

Love ESports maintains a showroom in Homosassa where customers can view available inventory and arrange test drives. The dealership stocks replacement parts and accessories from the same manufacturers represented in its vehicle lineup, ensuring compatibility and quality for all service needs.
