

Alpha Plumbing, Heating & Air Offers Comprehensive Plumbing Services

March 13, 2026

BLOOMINGTON, MN - March 13, 2026 - PRESSADVANTAGE -

Alpha Plumbing, Heating & Cooling has announced the availability of its plumbing services to address residential and commercial needs in the Twin Cities area. The services respond to common issues such as leaks, installations, and maintenance requirements that occur throughout the year. This announcement highlights options for handling plumbing concerns as seasonal changes approach.

Plumbing services in Bloomington, MN, encompass installations for new fixtures and piping in homes and businesses. These installations facilitate updates to bathrooms, kitchens, and other areas requiring reliable water systems. Repairs address problems including leaky faucets, burst pipes, and malfunctioning toilets, with technicians working to restore functionality. Remodel services adapt existing plumbing to accommodate renovations, ensuring systems align with new designs while meeting code standards.

Emergency plumbing services manage urgent situations, such as severe leaks or water heater failures. Water heaters undergo repairs or replacements to maintain a consistent hot water supply, supporting daily operations in households and commercial settings. Technicians respond to these calls to minimize downtime.

Gas services complement the plumbing offerings. Gas line installations connect appliances securely, while hookups integrate stoves, dryers, and heating units into systems. Leak detection identifies risks early, enabling interventions before escalation. Maintenance checks keep gas infrastructure in working order, and emergency services handle immediate concerns related to gas.

Drain services include cleaning to remove blockages, sewer inspections to assess pipe conditions, and repairs for damaged sections. Hydro-jetting clears persistent clogs using high-pressure water, providing an alternative to traditional approaches. Trenchless replacements allow for line repairs or upgrades with limited digging, preserving surrounding areas. Backflow prevention measures install devices to protect water supplies from potential contamination.

Heating services focus on furnace repairs to resolve malfunctions, particularly after periods of heavy use. Cooling services address air conditioning issues to ensure comfort during warmer months. Technicians diagnose problems and implement solutions, often completing work in a single visit based on their assessments.

Free estimates apply to new heating and cooling system installations, offering details for planning purposes. Club memberships provide maintenance plans with scheduled inspections, priority for appointments, and discounts on repairs. These plans cover regular check-ups for plumbing, heating, cooling, gas, and drain systems.

A one-year warranty applies to parts and labor on jobs performed. Pricing involves upfront quotes to outline costs before proceeding with work.

Customer reviews reflect experiences with these services. A review from three weeks ago described a thorough heating system inspection, including explanations of components and monitoring tips. Another from one month ago noted next-day scheduling for furnace maintenance. A three-month-old review detailed a prompt furnace repair during an outage. Additional feedback from five months ago mentioned a faucet replacement with cost details provided in advance. A separate review praised a water heater replacement, main shut-off valve installation, and kitchen plumbing adjustments during a renovation, highlighting responsiveness and part quality.

These accounts indicate patterns in service delivery, such as timely responses and clear communications during visits.

Alpha Plumbing, Heating & Cooling serves the Twin Cities metropolitan area, covering communities including St. Paul, Minneapolis, Woodbury, Plymouth, Eden Prairie, White Bear Lake, Stillwater, Edina, Brooklyn Park, Burnsville, Eagan, Apple Valley, Fridley, Coon Rapids, Roseville, Lakeville, Minnetonka,

Shakopee, Anoka, and Bloomington.

"Plumbing systems require attention to prevent minor issues from becoming major problems," said Chad Olson, owner at Alpha Plumbing, Heating & Cooling. "Regular inspections and timely repairs contribute to system longevity."

"Clear explanations during service help in understanding system operations," continued Olson. "This approach supports informed decisions on maintenance."

The company operates as a locally owned business, independent of larger corporate entities. This setup allows for decisions centered on service provision. Technicians receive training to manage a variety of tasks across plumbing, heating, cooling, gas, and drains.

Alpha Plumbing, Heating & Cooling provides solutions in these areas to support functional environments in homes and businesses.
