

# Udemy Course Teaches How To Detect Return Seasonalities For Improved Trading

*April 06, 2016*

April 06, 2016 - PRESSADVANTAGE -

Daniel Hall Combined Enterprises is proud to announced a new Udemy course. The course is 'Trading Seasonal Price Patterns in Stocks, Futures, & Forex', which has been designed to encourage people to be more successful with their trading activities. According to a University of Chicago Booth School of Business study, seasonality delivers an annual 13% expected return on stocks alone. The course can be accessed through <https://www.udemy.com/trading-seasonal-price-patterns-in-stocks-futures-forex/>

Dr. Scott Brown, spokesperson for Daniel Hall Combined Enterprises, says: "The new course that we are promoting is designed to ensure people can make the right investment decisions, thereby improving their expected financial future. This two-hour course covers 13 different lectures with strategies shown in the Journal of Finance to offer expected returns up to 21.6% when combined with momentum. To have the University of Chicago state that they expect at least 13% is a real testament to the excellent quality of the tactics taught in this program."

The study on seasonality was performed by none other than Dr. Juhani T. Linnainmaa, Associate Professor of Finance and PCL Faculty Scholar, NBER Faculty Research Fellow, from the University of Chicago Booth School of Business. His impressive credentials are listed in his university faculty profile on <http://faculty.chicagobooth.edu/juhani.linnainmaa/>. The actual study is in a document available through the Wiley Online Library, which is available through <http://onlinelibrary.wiley.com/doi/10.1111/jofi.12398/full>.

This research is the foundation for the TradeMiner software Scott uses inside the course to find seasonality in stocks, futures, and forex.

Dr. Brown recommends this clean path of study for serious investors who desire to learn more about return seasonalities. Those interested in learning more about the Udemy course are encouraged to visit the course's website, where they can gain instant, lifetime access to the course with a 30-day money back guarantee.
