

OA Design Marketing Ltd Introduces Enhanced Commercial and Residential Flooring Solutions Across Berkshire

May 06, 2026

BERKSHIRE, UK - May 06, 2026 - PRESSADVANTAGE -

OA Design Marketing Ltd, operating as Edge To Edge Home (Flooring Berkshire) - Flooring Coley, has introduced an enhanced range of commercial and residential flooring solutions to address evolving market requirements across Berkshire. The development includes expanded installation capabilities for hardwood, luxury vinyl tile, laminate, and commercial-grade carpet systems throughout Wokingham, Finchampstead, Spencers Wood, and Arborfield.

The introduction of these enhanced services responds to increased regional demand for professional flooring installations as property development and renovation activity continues to grow throughout Berkshire. The company has restructured its service delivery model to provide specialized solutions for both residential properties and commercial facilities requiring durable, high-traffic flooring systems.

"Market analysis indicates growing demand for professional flooring installations that meet specific performance requirements in both residential and commercial sectors," said Oliver Andrews, Director at OA Design Marketing Ltd. "Our enhanced service structure addresses these requirements through specialized installation techniques and materials selection processes designed for different environment types and usage patterns."

The residential services now include wood flooring installations utilizing traditional and modern installation methods, laminate flooring systems for cost-conscious projects, and luxury vinyl tile applications. Each service category incorporates specific installation protocols developed for residential environments, addressing factors including moisture resistance, thermal properties, and acoustic performance.

Commercial installations feature flooring systems engineered for high-traffic environments, including retail spaces, office buildings, and institutional facilities. The commercial portfolio encompasses wood flooring with enhanced durability specifications, commercial-grade laminate systems, and luxury vinyl tile installations

designed to meet commercial building standards and safety requirements.

The company has added specialized services including flooring maintenance programs, repair services for existing installations, and carpet whipping and binding treatments. Additional capabilities include sheet vinyl flooring installations for healthcare and educational facilities, safety flooring systems for industrial applications, and flooring improvement consultations for property managers and facility operators.

Technical capabilities span multiple flooring categories, enabling comprehensive assessments of substrate conditions, moisture levels, and structural requirements. Installation teams employ industry-standard practices for surface preparation, adhesive application, and finishing treatments to ensure installations meet manufacturer specifications and building codes.

The service enhancement includes expanded inventory management systems to ensure material availability and reduced project timelines. Quality control procedures have been implemented at each installation phase, from initial site assessment through final inspection, documenting compliance with industry standards and manufacturer guidelines.

OA Design Marketing Ltd operates throughout Berkshire, providing flooring installations for new construction projects, renovation initiatives, and property improvement programs. The company maintains certifications for various flooring systems and installation methodologies, ensuring compliance with current building regulations and industry standards. Service delivery encompasses initial consultations, material specification, installation scheduling, and post-installation support for both residential and commercial clients throughout the region.
