

## **Waterline Remodeling Launches Premium General Contractor Services in Southwest Florida**

*March 11, 2026*

NAPLES, FL - March 11, 2026 - PRESSADVANTAGE -

Waterline Remodeling has officially launched its premium remodeling services to serve the high-end residential market throughout Southwest Florida. The Naples-based company specializes in comprehensive home renovations, with particular expertise in kitchen remodeling in Naples and bathroom transformations for luxury properties across the region.

The new venture represents a strategic expansion that brings extensive home services industry experience to this specialized remodeling division. The company focuses on delivering sophisticated renovation solutions for homeowners seeking to enhance their properties with premium materials and custom designs suited to coastal living.

The company offers comprehensive remodeling services throughout Bonita Springs, Cape Coral, Fort Myers, Fort Myers Beach, Marco Island, and Naples. Services include complete bathroom renovations, kitchen remodeling in Naples, Florida, custom carpentry, flooring installation, and whole-home interior renovations. Each project emphasizes durability and timeless design, accounting for the specific challenges posed by heat, humidity, and salt air common to Florida coastal properties.

Kitchen remodeling projects typically involve creating more open layouts, installing custom cabinetry, upgrading to premium countertops, and incorporating modern lighting and appliances. The company's bathroom renovation services focus on creating spa-like retreats that combine luxury with practical considerations for the coastal environment.

"Every renovation project we undertake starts with understanding how our clients live in their homes and what improvements will have the most meaningful impact on their daily lives. "Whether we're reconfiguring a kitchen to improve workflow and natural light or transforming a bathroom into a personal sanctuary, our goal is to create spaces that enhance both beauty and functionality."

The launch comes at a time when many Southwest Florida homeowners are investing in substantial home improvements rather than relocating, driven by rising property values and limited inventory in the luxury market. The region's continued population growth and economic development have created strong demand for premium remodeling services.

Waterline Remodeling operates under General Contractor License CGC1513681 and maintains comprehensive insurance coverage for all projects. The company's team includes experienced craftsmen, project managers, and design consultants who collaborate to ensure each renovation meets exacting standards.

Beyond kitchen and bathroom remodeling in Naples, Florida, the company provides commercial renovation services, custom deck construction, drywall installation and repair, door installation, interior painting, and coordination of plumbing and electrical work through licensed subcontractors. This comprehensive service offering allows clients to work with a single contractor for complex, multi-faceted renovation projects.

Waterline Remodeling serves the Southwest Florida region from its Naples headquarters, providing premium remodeling services to residential and commercial clients throughout the area's most prestigious neighborhoods and developments.
