

# OA Design Marketing Ltd Unveils Comprehensive Flooring Installation Framework for Berkshire Properties

*May 18, 2026*

BERKSHIRE, UK - May 18, 2026 - PRESSADVANTAGE -

OA Design Marketing Ltd, operating as Edge To Edge Home, has unveiled a comprehensive flooring installation framework designed to address evolving requirements in Berkshire's residential and commercial property sectors, with implementation beginning this quarter across multiple service areas.

The new framework establishes separate installation protocols for residential and commercial projects, incorporating distinct material assessment procedures and project management systems. The initiative responds to regional data showing increased flooring renovation activity across Thatcham, Newbury, Cold Ash, Midgham, and Greenham, where property owners require specialized installation approaches for different flooring materials.

"The framework represents a significant restructuring of how flooring installations are approached in the Berkshire region," said Oliver Andrews, Director at OA Design Marketing Ltd. "By implementing separate protocols for residential and commercial environments, installations can address the specific technical requirements of each sector, from moisture testing in residential wood flooring to traffic analysis for commercial spaces."

The framework introduces material-specific installation procedures across four primary flooring categories. Wood flooring installations now incorporate mandatory moisture content testing and acclimatization periods ranging from 48 to 72 hours depending on environmental conditions. Luxury vinyl tile installations require substrate moisture readings below three percent and flatness tolerances within industry specifications. Laminate flooring procedures include calculated expansion gaps based on room dimensions and seasonal temperature variations. Carpet installations follow revised stretching protocols to accommodate different backing materials and pile densities.

Edge To Edge Home (Flooring Berkshire) - Flooring Thatcham has established assessment criteria that

evaluate multiple environmental factors before material selection. These assessments measure anticipated foot traffic patterns, ambient moisture levels, subfloor composition, and maintenance access requirements. The data collected informs both material recommendations and installation methodologies.

Commercial installations under the new framework incorporate wear pattern analysis and traffic flow mapping to determine appropriate flooring specifications. High-traffic zones receive materials rated for commercial use, with installation methods adjusted to accommodate business operational schedules. The framework specifies minimum cure times, adhesive specifications, and transition strip requirements for commercial environments.

Recent construction industry reports indicate flooring installations account for approximately fifteen percent of property renovation budgets across the UK, with professional installation services growing at an annual rate of eight percent in regional markets. Berkshire's property sector has recorded a twenty-two percent increase in flooring renovation projects over the past eighteen months, according to regional construction data.

The implementation includes updated project management systems that coordinate multiple installation teams across concurrent projects. Scheduling protocols now account for material lead times, which have extended from an average of two weeks to four weeks for certain imported flooring products. Installation timelines incorporate buffer periods for unexpected substrate repairs, which occur in approximately thirty percent of projects based on company data.

OA Design Marketing Ltd provides flooring installation services throughout Berkshire, specializing in wood, laminate, luxury vinyl tile, and carpet installations. The company maintains installation teams trained in both residential and commercial flooring applications, serving property owners and managers across the region from its operational base covering Thatcham and surrounding areas.
