

# Edge To Edge Home Flooring Expands Flooring Installation Services Across Commercial and Residential Markets

*May 29, 2026*

BERKSHIRE, UK - May 29, 2026 - PRESSADVANTAGE -

OA Design Marketing Ltd, operating as Edge To Edge Home (Flooring Berkshire) - Flooring Ascot, announces expanded flooring installation capabilities serving residential and commercial properties throughout Berkshire. The expansion responds to increased demand for professional flooring installations across Sunninghill, Sunningdale, Winkfield, and Cheapside regions.

The company now offers comprehensive flooring solutions including hardwood, luxury vinyl tile, laminate, and carpet installations. The service expansion encompasses both single-room residential projects and large-scale commercial facility installations, addressing diverse property requirements across the region.

"Market analysis indicates significant growth in Berkshire property renovations requiring professional flooring expertise," said Oliver Andrews, spokesperson from Edge To Edge Home Flooring. "Our expanded services address this demand through specialized installation teams trained in both traditional hardwood techniques and modern vinyl applications."

Residential flooring services include wood flooring installations, laminate flooring solutions, and luxury vinyl tile applications. Each installation follows standardized consultation protocols to determine appropriate materials based on room usage, foot traffic patterns, and substrate conditions. The residential division handles projects ranging from individual room updates to complete property flooring replacements.

Commercial flooring operations focus on high-traffic installations for retail establishments, office spaces, and hospitality venues. Commercial-grade wood flooring installations utilize materials rated for heavy foot traffic, while laminate and luxury vinyl tile options provide alternatives for spaces requiring specific acoustic or moisture-resistant properties. Installation methodologies accommodate business operational requirements, including phased installations to minimize disruption.

The expansion includes investment in specialized equipment for substrate preparation and precision cutting technology. Installation teams complete manufacturer certification programs for warranty compliance across multiple flooring brands. Technical capabilities now encompass moisture barrier installations, acoustic underlayment systems, and specialized adhesive applications for various flooring types.

"Flooring technology continues evolving, particularly in engineered wood and luxury vinyl tile categories," added Andrews. "Our teams maintain current certifications across these product lines to ensure installations meet manufacturer specifications and building code requirements."

The company maintains inventory partnerships with flooring manufacturers to ensure material availability across various price points and specifications. Quality control procedures include pre-installation substrate testing, moisture content verification, and post-installation inspection protocols. Each project receives documentation including warranty information and maintenance guidelines specific to installed materials.

Service areas throughout Berkshire include residential neighborhoods and commercial districts where property owners require professional flooring installations. The company coordinates with general contractors, property management firms, and individual property owners to schedule installations within renovation timelines. Project management systems track each installation from initial measurement through completion, ensuring adherence to agreed specifications and schedules.

OA Design Marketing Ltd established its flooring operations to address gaps in professional flooring services across Berkshire. The company employs installation specialists with backgrounds in both residential and commercial flooring applications. Current operations include showroom facilities displaying various flooring options, allowing clients to evaluate materials before installation decisions. The Berkshire flooring division continues adapting service offerings based on regional construction trends and emerging flooring technologies.
