

Algo Trading Space Announces Partnership with IC Markets

March 23, 2026

ELIN PELIN, BG - March 23, 2026 -
Algo Trading Space, an algorithmic trading education and tools platform, has announced a formal partnership with IC Markets, one of the largest global CFD brokers by trading volume. The agreement establishes IC Markets as a preferred broker partner within the Algo Trading Space ecosystem, giving the platform's community of algorithmic traders a verified and integrated pathway to access the broker's trading infrastructure.

The partnership connects two organizations that share a focus on systematic and automated trading. Algo Trading Space provides traders with Expert Advisors, strategy development tools, and live-tracked trading accounts, while IC Markets offers the execution environment in which those strategies are deployed. Under the arrangement, traders who open accounts through the designated affiliate link on the Algo Trading Space platform gain access to the broker's full suite of trading conditions alongside the platform's publicly available performance data across its IC Markets accounts, allowing for a more informed starting point when transitioning from strategy development to live deployment.

Petko Aleksandrov, Founder of Algo Trading Space, described the partnership as a natural extension of the

platform's existing relationship with the broker. "IC Markets has been part of our live trading environment for some time," Aleksandrov said. "Formalizing the relationship means we can provide our community with a more structured and supported path to trading with a broker whose infrastructure suits algorithmic strategies."

IC Markets has operated since 2007 and holds regulatory licenses with the Australian Securities and Investments Commission, the Cyprus Securities and Exchange Commission, and the Financial Services Authority of Seychelles. The broker provides access to more than 2,200 tradeable instruments across foreign exchange, indices, commodities, equities, bonds, and futures. Its execution infrastructure is housed in Equinix data centers, with average order processing speeds under 40 milliseconds. The broker places no restrictions on scalping, hedging, or automated trading strategies and supports virtual private server hosting for qualifying account holders, a relevant consideration for traders running Expert Advisors on a continuous basis across multiple currency pairs.

IC Markets supports trading on MetaTrader 4, MetaTrader 5, cTrader, and TradingView, giving algorithmic traders flexibility in how they build, test, and deploy automated strategies. The broker's Raw Spread account type provides direct interbank pricing beginning at zero pips on major currency pairs, a structure that Algo Trading Space has used as the basis for the majority of its live-tracked accounts with the broker.

Algo Trading Space currently maintains 25 live-tracked accounts with IC Markets, running a range of automated strategies across multiple currency pairs, gold, and other instruments. Performance records are published openly on the platform, allowing traders to review real trading outcomes before committing capital to any particular strategy or configuration.

The partnership also positions IC Markets as one of the participating brokers in the Algo Trading Space free Expert Advisor campaign, through which traders who open a qualifying account can receive a complimentary EA license from the platform's catalog. The campaign is designed to reduce the upfront costs associated with entering algorithmic trading and is open to new account holders who register through the affiliate link on the Algo Trading Space platform.

Aleksandrov noted that broker selection remains one of the most consequential decisions for traders running automated systems. "The infrastructure a broker provides directly affects how a strategy performs in live conditions," he said. "This partnership gives our community confidence that IC Markets has been evaluated against the demands of algorithmic trading, not just general retail use."

Traders who open a Raw Spread account with IC Markets through the Algo Trading Space affiliate link receive a reduction on the standard commission rate. Further details are available through the IC Markets broker profile at algotradingspace.com/companies/brokers/ic-markets.

About Algo Trading Space
