

Amana Care Clinic Announces Enhanced Walk-In Medical Services Across Quad Cities Region

March 17, 2026

DAVENPORT, Iowa - March 17, 2026 - PRESSADVANTAGE -

Amana Care Clinic has announced enhanced walk-in medical services across its three Quad Cities locations, responding to increased patient volume that has grown by 35 percent over the past quarter, according to facility data released this week.

The urgent care clinic locations in Davenport, Bettendorf, and Muscatine have implemented extended diagnostic capabilities and adjusted staffing patterns to accommodate the rising number of patients seeking immediate medical attention for non-emergency conditions. The announcement comes as regional healthcare data shows urgent care visits in Iowa have increased substantially, with facilities now handling approximately 40 percent of non-emergency medical visits statewide.

"We have observed consistent growth in patient visits, particularly during evening and weekend hours when traditional medical offices are closed," said Moutaz Kotob, PhD, Medical Director at Amana Care Clinic. "This service enhancement allows us to maintain efficient patient flow while ensuring each individual receives

appropriate medical attention for their specific condition."

Amana Care Clinic non-emergency treatment near Davenport IA encompasses treatment for conditions including respiratory infections, minor injuries, skin conditions, and routine diagnostic services. The facilities maintain on-site X-ray equipment and laboratory testing capabilities, enabling same-visit diagnosis and treatment for numerous medical conditions.

The enhanced services address a documented gap in healthcare accessibility across the Quad Cities region. According to recent Iowa Department of Public Health statistics, the average wait time for primary care appointments has extended to 24 days, while emergency department visits for non-critical conditions contribute to overcrowding and increased healthcare costs.

Amana Care Clinic Davenport urgent care services operate on a walk-in basis, eliminating the need for advance appointments. The clinic treats conditions ranging from minor lacerations and burns to urinary tract infections and joint pain. Additional services include sports physicals, laboratory testing, and X-ray diagnostics.

"The data indicates that patients are increasingly utilizing urgent care facilities for conditions that require prompt attention but do not warrant emergency department visits," noted Dr. Kotob. "Our enhanced services directly address this healthcare delivery trend while maintaining the walk-in accessibility that defines urgent care medicine."

The service enhancement coincides with seasonal increases in respiratory illnesses and minor injuries typical of autumn months. Healthcare industry analysis from the Urgent Care Association reports that facilities nationwide have experienced similar growth patterns, with patient visits increasing by an average of 7 percent annually over the past three years.

The clinic's certified medical professionals utilize diagnostic equipment including digital X-ray systems and comprehensive laboratory testing capabilities. These resources enable immediate evaluation and treatment of fractures, infections, and other acute medical conditions without referral to external facilities.

Amana Care Clinic operates as a walk-in medical facility specializing in non-emergency healthcare services. The clinic provides treatment for acute illnesses, minor injuries, diagnostic services, and preventive care across three Quad Cities locations. Medical staff includes board-certified physicians and licensed healthcare professionals trained in urgent care medicine. The facility offers comprehensive diagnostic capabilities including laboratory services and X-ray imaging, serving patients throughout the Davenport, Bettendorf, and

Muscatine communities.
