

# **Endeavor House North Announces New Management and Renewed Commitment to Comprehensive Addiction Treatment**

*March 23, 2026*

KEARNY, NJ - March 23, 2026 - PRESSADVANTAGE -

Endeavor House North, a licensed and accredited addiction treatment center serving the greater New Jersey area, today announced that the facility is operating under new management with a strengthened focus on providing comprehensive addiction care from initial detoxification through long-term recovery support.

The treatment center, located in Kearny just 20 minutes from New York City, provides medically supervised detoxification, residential rehabilitation, and outpatient programs designed to address the complex needs of individuals struggling with substance use disorders. The transition to new management represents a strategic commitment to enhancing the continuum of care that research shows is essential for sustained recovery.

"With new leadership comes a renewed focus on delivering consistent, high-quality care across every level of treatment," says a representative from Endeavor House North. "Addiction recovery doesn't happen in a single phase?it requires a continuum of support that begins with detox and continues through residential and

outpatient care. Our goal is to provide a stable, structured environment where individuals can build a strong foundation for lasting recovery."

Endeavor House North offers inpatient detox services that typically span five to seven days, depending on the substance and individual needs. The medically supervised program ensures patient safety and comfort during withdrawal, with at least seven on-site nurses experienced in substance use treatment providing round-the-clock care. Following detoxification, patients transition to appropriate levels of care based on their personalized treatment plans.

The facility provides evidence-based treatment for various substance dependencies, including alcohol, heroin, benzodiazepines, and cocaine, as well as specialized programming for individuals with co-occurring mental health disorders. Each treatment approach is tailored to address the specific challenges associated with different substances while focusing on developing practical strategies for maintaining sobriety.

Under the new management structure, Endeavor House North in Kearny, NJ continues to emphasize the importance of integrated treatment approaches. The facility's comprehensive services include Medically Assisted Treatment under the supervision of experienced medical professionals, individual and group counseling, mental health support, and aftercare planning. The treatment team works collaboratively to ensure seamless transitions between levels of care, recognizing that recovery is an ongoing process requiring sustained support.

The facility features modern amenities designed to support the recovery process, including updated group therapy rooms, a fitness center, recreational spaces, and comfortable living quarters. Nutritious meals are prepared under the direction of a registered dietitian, supporting physical healing alongside therapeutic interventions.

Beyond immediate treatment services, the center maintains an active alumni community that provides ongoing support to individuals after they complete their formal treatment programs. This continued connection helps reinforce recovery skills and provides a network of peer support that research indicates is crucial for long-term success.

Endeavor House North accepts insurance from multiple providers, including Aetna, Blue Cross, Cigna, and Optum, making treatment accessible to a broader population in NJ and surrounding areas. The facility holds certifications from The Joint Commission and LegitScript, demonstrating compliance with rigorous healthcare quality standards.
