

## **Freedom Restoration & Remodeling Broadens Customer Services**

*April 17, 2026*

APPLETON, WI - April 17, 2026 - PRESSADVANTAGE -

Freedom Restoration & Remodeling, an IICRC-certified property damage restoration and remodeling company serving Northeast Wisconsin since 2018, has expanded its service capabilities to provide more comprehensive solutions for residential and commercial property owners throughout the region. The family-owned company brings over 25 years of combined industry experience to every project, offering a local alternative to franchise restoration companies. This expansion reflects the company's ongoing commitment to serving neighbors across the Appleton area and beyond with reliable, full-service property damage solutions.

The locally owned company, headquartered in the Appleton area, has strengthened its mold remediation services while continuing to build on its established water damage restoration, fire damage restoration, contents cleaning, storm cleanup, and full reconstruction services. This growth allows the company to address an even broader range of property damage scenarios through its existing in-house team, reducing the need for multiple contractors on complex projects.

Property damage situations often involve interconnected challenges that require coordinated expertise. Fire damage typically requires both smoke remediation and water extraction from firefighting efforts, while water

damage from burst pipes or flooding demands rapid response to prevent secondary issues like mold growth. At Freedom Restoration & Remodeling, the restoration experts handle these multi-faceted situations from initial emergency response through complete property rebuild, including the cleaning and restoration of household contents affected by water, smoke, or fire.

The company maintains IICRC certification for both water damage restoration and fire damage restoration, adhering to industry standards established by the Institute of Inspection, Cleaning and Restoration Certification. This organization sets guidelines for professional restoration practices across the United States, ensuring property owners receive services that meet nationally recognized quality benchmarks.

"Our goal has always been to help our neighbors get their properties and their lives back to normal as efficiently as possible," said Patty Opperman, owner of Freedom Restoration & Remodeling. "Having comprehensive in-house capabilities means families dealing with property damage can work with one local team they trust from the first phone call through the final walkthrough."

The company operates around the clock with 24/7 emergency response, arriving at properties throughout Northeast Wisconsin with an average response time of 45 minutes. Service areas include communities such as Green Bay, New London, Black Creek, Seymour, Kaukauna, and surrounding areas. This service model emphasizes rapid initial response followed by coordinated mitigation and reconstruction efforts handled by the same dedicated team.

Contents cleaning services offered by Freedom Restoration & Remodeling include the removal, securing, and inventorying of household items, as well as specialized cleaning to restore belongings affected by water, smoke, or soot damage. This capability allows homeowners to preserve irreplaceable personal items, including family photographs, important documents, and cherished possessions that might otherwise be lost following a disaster.

The company works directly with insurance companies on behalf of property owners, handling claim documentation and coordination as part of its service approach. This direct insurance handling aims to reduce administrative burden for property owners during what is often an already stressful restoration process, allowing families to focus on getting back to normal life.

As a family-owned business with over 25 years of combined industry experience, Freedom Restoration & Remodeling serves both residential homeowners and commercial property owners. The team addresses damage scenarios ranging from appliance leaks and sewer backups to major flood events and structural fire damage. All services from emergency board-up through final reconstruction are performed by the company's experienced in-house team, providing continuity and accountability throughout the entire restoration process.
