BlindQuest Elevates Home Comfort with Custom Window Treatment Solutions and Expert Design Services

April 28, 2026

TROY, IL - April 28, 2026 -
BlindQuest Inc., a Troy, Illinois-based custom window treatment specialist, continues to transform homes throughout the region with personalized design consultations and comprehensive window covering solutions that enhance comfort, privacy, and energy efficiency.

The family-owned company, operating as an authorized Hunter Douglas Gallery, provides homeowners with access to an extensive selection of custom blinds, shades, and shutters, along with professional design expertise delivered through complimentary in-home consultations. This comprehensive approach addresses the growing demand for window treatments that balance aesthetic appeal with functional benefits such as light control and improved insulation.

BlindQuest specializes in creating tailored solutions that match each home's unique architectural features and the homeowner's lifestyle needs. The company's design consultants work directly with clients in their homes, evaluating factors including room orientation, existing décor, and specific requirements for privacy and light management.

"Every home presents distinct challenges and opportunities when it comes to window treatments," said Carly Shaffer, Design Consultant at BlindQuest. "Our in-home consultation process allows us to understand not just the measurements and specifications, but how our clients actually live in their spaces. This insight enables us to recommend solutions that truly enhance their daily comfort and enjoyment of their homes."

The company's product portfolio encompasses a wide range of options from leading manufacturers including Hunter Douglas, Carole Fabrics, Insolroll, and Alta. Available selections include cellular shades for superior insulation, sheer shades that diffuse harsh sunlight while maintaining views, and hardwood shutters that

provide classic elegance and durability. Each product category offers varying degrees of light filtration, privacy control, and energy efficiency benefits.

Blinds by BlindQuest are custom-measured and professionally installed to ensure precise fit and optimal performance. The company's installation team handles all aspects of the process, from initial measurements through final installation, eliminating common issues associated with standard-sized window treatments.

Beyond installation, the company maintains a dedicated repair center for Hunter Douglas products, providing ongoing support to ensure window treatments continue performing optimally over time. This service component reflects the company's commitment to long-term customer relationships and product sustainability.

Energy efficiency remains a key consideration for many homeowners selecting window treatments. Properly selected and installed window coverings can significantly reduce heat gain during summer months and heat loss during winter, contributing to lower energy costs and improved indoor comfort. Cellular shades, for instance, create insulating air pockets that help maintain consistent indoor temperatures year-round.

The showroom facility operates by appointment, allowing customers to explore product options in a focused, personalized setting with dedicated attention from design staff. This approach ensures each client receives comprehensive information about materials, operating systems, and design possibilities relevant to their specific project.

BlindQuest Inc. has established itself as a trusted resource for custom window treatments in the Troy area, combining extensive product knowledge with personalized service. The company maintains memberships with the Chamber of Commerce and the Home Builders and Remodelers Association, and holds accreditation from the Better Business Bureau.
